

Build knowledgeable AI with Pinecone on Azure

Pinecone is the leading vector database. Pinecone provides the AI infrastructure needed to ground AI applications in large amounts of proprietary data, making them accurate, knowledgeable, and with fewer hallucinations.

Pinecone has raised \$138M in funding from leading investors Andreessen Horowitz, ICONIQ Growth, Menlo Ventures, and Wing Venture Capital, and operates in New York, San Francisco and Tel Aviv.

#1

Vector database on G2

200M queries/day

30B+ vectors stored

Millions

SDK downloads per month

Trusted by 5000+ industry leaders

Deliver knowledgeable AI applications with Pinecone on Azure

Fast time to value at any scale

Fully-managed platform that delivers a seamless user experience for hassle-free scaling. Our Azure native integration and AI App Templates make it easy to build with Pinecone on Azure.

Consistently fast, accurate results

Proprietary architecture and algorithms deliver fresh, high-quality data, even as your data evolves and grows.

Secure and enterprise-ready

GDPR-ready, SOC2 Type II certified, HIPAA-compliant. Easily control and manage access within the console with SSO, RBAC, and CMEK. Data is encrypted at rest and in transit.

Popular use cases: Enhance performance and increase efficiency

Tom Davis
Partner
Microsoft for Startups

"Our launch of a first-to-market AI feature was made possible by Pinecone serverless. Their technology enables our Q&A AI to deliver instant answers to millions of users, sourced from billions of documents. Best of all, our move to their latest architecture has cut our costs by 60%, advancing our mission to make software toolmaking ubiquitous."

Want to learn more?

Choosing a database is an important decision — and we want you to make an informed choice! Here are some technical resources to help you in your research (we also invite you to join our community at pinecone.io).
