

PINGALA

Agile and innovative solutions

License optimization – Part of position types

What's unique

Pingala security utility

GDPR
Ensures-GDPR compliance

- GDPR activity log
- Configurable-GDPR restrictions
- Off-boarding rules for GDPR

Segregation of Duties
Segregate the business process to protect against fraud

- Task definitions
- Conflict definitions
- Conflict analytics
- Severity analytics

Licensing optimization
Based on position type, optimize licenses and reduce administration of user rights.

- User activity log
- User role log
- Automatic role assignment
- Behavioral analytics
- Cost analytics

Process optimization
Ensure users are only provided with the information and functionality they need

Employees and contractors
Define and secure user rights, user interface, and license compliancy

Feature management
Control Microsoft releases, secure appropriate user rights and licensing

LICENSE OPTIMIZATION

Process optimization

Provide users with only the information and functionality that they need to optimize process execution time

GOALS

By optimizing process efficiency, cost savings can be achieved when functionality is tailored to user needs

Cost efficiency

Security model
