weavix

What is weavix?

weavix® is an industry-leading communication platform designed to support and reinforce productivity and safety for the frontline workforce. We enable workers to perform better by connecting them with all their colleagues like never before. Enterprises have weavix® to close the last mile from field to office, leading to streamlined communications for every worker and transforming how we keep workers safe and connected.

Our innovative walt® smart radio is the easy-to-deploy solution to build a collaborative ecosystem for frontline workers with the latest in communication technology. weavix is the Internet of Workers® platform, built to strengthen workforces and maximize safety and productivity through communication and data-driven insights.

- Fast Deployment with Tap-and-Go Registrations
- State-of-the-Art Communication Capabilities
- Modern Safety Solution for Workers
- Complimentary Hassle-Free Managed Service
- Boost Efficiency through Communication
- Proven to Improve Collaboration Enterprise-wide

Company Overview

Founded in 2018, weavix® aims to disrupt the status quo to optimize frontline work through communication technology. Historically, new technologies have had limited deployments for frontline workers, focusing primarily on things rather than people. As the Internet of Workers® platform, we understand the value of your workforce and strive to improve their performance through disruptive innovations in communication.

weavix® equips every worker with a rugged, purpose-built smart radio, granting them instant access to the latest in communication technology. With communication comes the opportunity to direct effective safety measures and scalable productivity management solutions throughout your facility and entire organization.
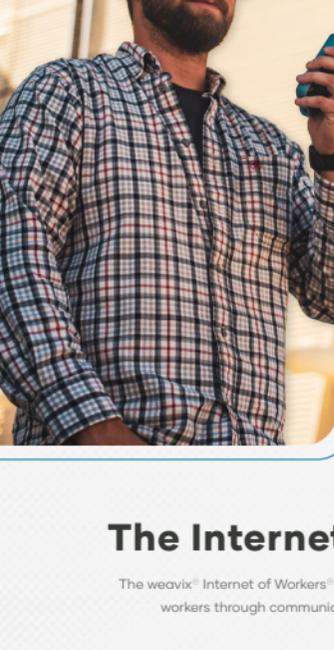

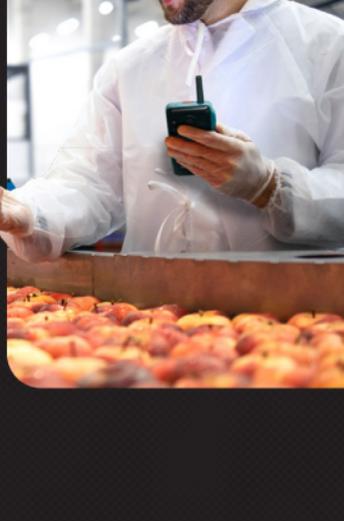

Enabling your Greatest Resource: The Frontline Worker

Representing over 3 billion workers globally, the frontline workforce is the ultimate, and most disenfranchised, resource available. By enabling every worker with smart radios, weavix® builds a mass network of connected workers at scale, granting corporations the visibility into their frontline that's never been possible. Using communication, safety, and data-driven solutions, we elevate your most powerful resource: your frontline workforce.

## The Internet of Workers Platform

The weavix® Internet of Workers® platform is the premier plug and play solution used to connect workers through communication and data to transform frontline efficiency at scale.
