

Power Apps - App in a Day

– 1 day workshop

PlanB.

In our "App in a Day"-workshop, you will develop a functional solution step by step using the Microsoft Power Platform. Together we will design a device ordering app for fictitious company locations. From the creation of a canvas app to the automation of approval processes with Power Automate - this workshop offers you practical know-how for your entry into the Microsoft Power Platform.

FOR YOU THIS MEANS

Digitize and simplify processes.

- Develop a canvas app for device ordering and use intuitive tools in the Power Apps Maker portal.

Build a solid database.

- Create and connect Dataverse tables to manage data in a structured and efficient way.

Automate workflows and work more efficiently.

- Use Power Automate to automate approval processes and integrate Teams notifications.

WORKSHOP CONTENT

1: Introduction and overview

- Get an overview of the Power Platform with Power Apps, Power Automate, Dataverse and Power BI.
- Get to know real application examples and their advantages.

2: Creation of a canvas app for ordering devices

- Introduction to app development in the Maker Portal.
- Add galleries, data sources and dynamic screens.
- Design of components and use of AI-supported features such as Copilot.

3: Creation of a Dataverse table for machine creation

- Discover the possibilities of Microsoft Dataverse.
- Create custom tables and connect data seamlessly with your app.

4: Development of a model-controlled app with Power Apps

- Design of a model-controlled app for device orders.
- Integration of business process flows and customization of forms and views.

5: Integration of Power Automate for workflow automation

- Create cloud flows for approval processes and use conditional logic.
- Promote team collaboration with automated notifications in Microsoft Teams.

At the end of the workshop you will be able to:

- Create individual business apps with Power Apps - from simple to complex solutions.
- Build data-driven processes with Microsoft Dataverse.
- Automate approval and notification processes to save time and resources.

Register now for our tried-and-tested workshop and unleash the potential of the Microsoft Power Platform!

Why PlanB.

Our 100% commitment to Microsoft technologies means that we can draw on decades of product experience and expert knowledge combined with the use of suitable and proven project methods and operating models.
