# Vehicle & Key Management
Simple, secure, intelligent and based on Azure.

Just open it. Close reliable. Intelligent management. We want you and your customers to achieve their destinations - quickly and easily.

That's why we offer a key and data management solution based on Azure that's as simple as it is smart. Your employees and customers can open and close vehicles keyless using an app. Define who, when and to which vehicle has access and manage all relevant telemetry data in a convenient and clear portal. If necessary, the solution is provided white-labeled for designing and implementing to your needs.

Vehicle & Key Management

This at-a-glance box

- Keyless opening and closing of vehicles by app
- Data access via desktop and app
- Convenient key and vehicle management
- Spontaneous mobile assignment of access authorizations
- No handover of physical keys and vehicles necessary

SIMPLE.

Place the box anywhere in the car.

Register the vehicle in the portal.

Any registered user can already open the vehicles activated for him via an app.

No assembly, no installation, no key programming.

SECURE.

Fulfils the highest standards of data security and encryption technology

Each box is secured with its own cryptographic key.

High data security and encryption technology.

INTELLIGENT.

Intelligent and easy management of:

- Vehicles
- Access privileges
- access times
- telemetry data

A portal that exactly offers what you need.

"Microsoft Azure and PlanB. have given us the decisive time advantage on our way to market readiness in a market that has already been exploited by competitors."

- Paul Meier, Director, Witte Digital

Microsoft Partner | Gold Cloud Platform / Gold Cloud Productivity / Gold Windows and Devices / Gold Datacenter

Full service for key and vehicle management.

Holistic solution for fleet managers, car rental companies, car sharing providers, taxi entrepreneurs, overnight deliverers, CEP service providers – and all other fleet managers who want to work more efficiently.

Secure User Management

Based on Microsoft Azure Identity Platform for secure user management.

Work more efficiently

No time required for handing over keys. Employees and fleet managers save time - regardless of business hours.

Flexible User Management

Assign and remove permissions spontaneously at any time via Azure Active Directory B2C.

Adaptable Branding

The solution can be ordered white-labeled for designing and implementing to your or your customer design needs.

Vehicle & Key Management

Our promise to you:

- Ready for use in the vehicle within a few minutes.
- No complicated installation of locking systems.
- No access to the vehicle electronics necessary.
- Use the original vehicle key in a small box that takes up little space.
- Therefore almost no installation costs.
- Internet-independent communication between app and box via Bluetooth.
- Simple onboarding process:
    - Invitation by e-mail.
    - Download app.
    - Set password.
    - Done.

Why PlanB.?

Digital Software Engineering is a key component for smart IoT solutions. At PlanB the development of innovative and smart digital products is driven by a closely interlinked digital product model that integrates across disciplines.

With our expertise in Software Engineering and DevSecOps Engineering, we combine Platform Design & Architecture services, Experience Design methods for rapid development of modern UX/UI and the agile delivery of our Digital Product Factory to a full-lifecycle offering. This makes us a strategic partner in our clients Digital Transformation.

We are passionately thrilled to contribute to our clients' success and are proud of the references and recommendations we got.
