

Microsoft Security Assessment

Get the roadmap to secure Microsoft 365.

Attackers understand that identity is the key to securing, and so they are focused heavily on stealing and cracking passwords. Once they have a valid username and password, they can work their way toward their ultimate target: information.

Our offering is designed for people responsible for IT security. The Microsoft Security Assessment evaluates and prioritizes security recommendations for your organization. Based on these recommendations the Security Assessment provides you a customized, prioritized and actionable security roadmap.

Security Assessment
