

Plan Heal

Chronic Kidney Disease Journey Assistant

Scales Chronic Kidney Disease patient health monitoring for better access and risk detection

Plan Heal is a
Microsoft
for Startups
Company!

The Problem

High numbers of Chronic Kidney Disease-CKD incidences that go misdiagnosed, undiagnosed, or late-detected.

CKD Care is Skyrocketing

Medicare spending for beneficiaries with CKD ages 66 or older exceeded \$70 billion in 2018, representing 23.8% of Medicare spending in this age group.

Source: National Institute of Health - NIH: Medicare spending for beneficiaries with CKD (not including ESKD) ages 66 or older exceeded \$70 billion in 2018, representing 23.8% of Medicare spending in this age group.

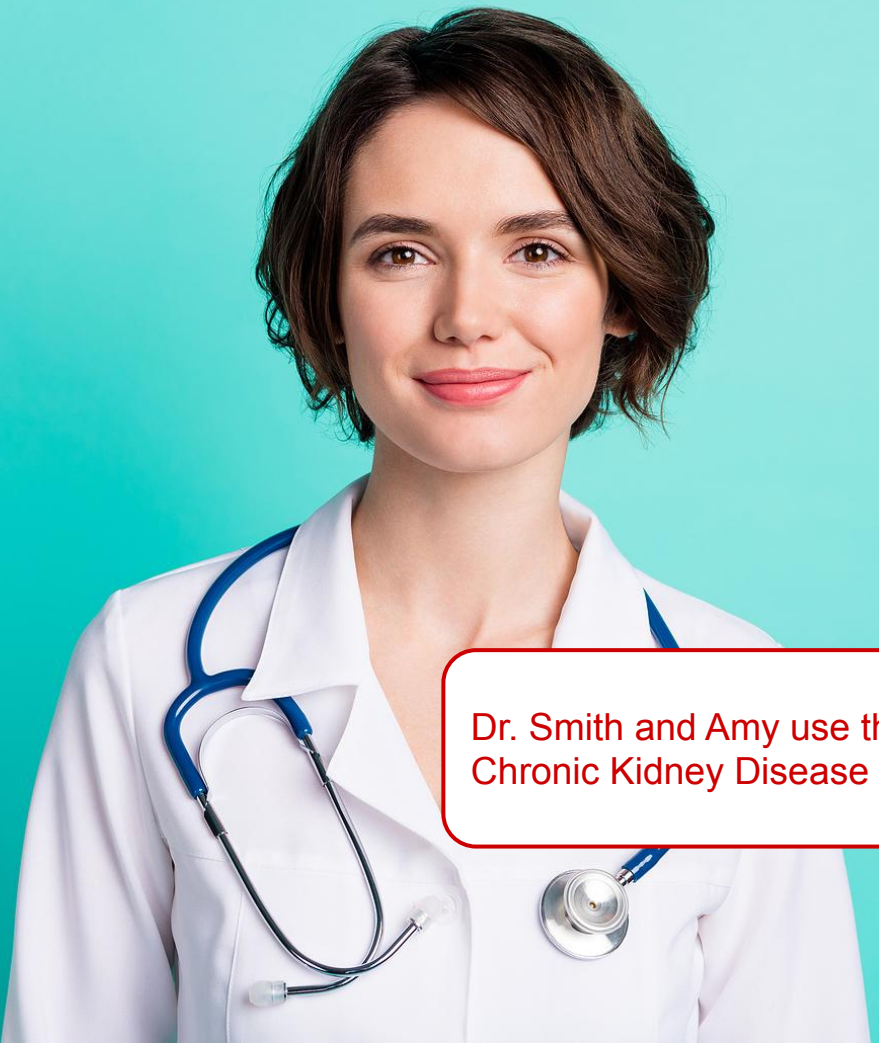

Product Solution

The CKD Journey Assistant is a Smart Health Bot that can more efficiently scale patient monitoring and care.

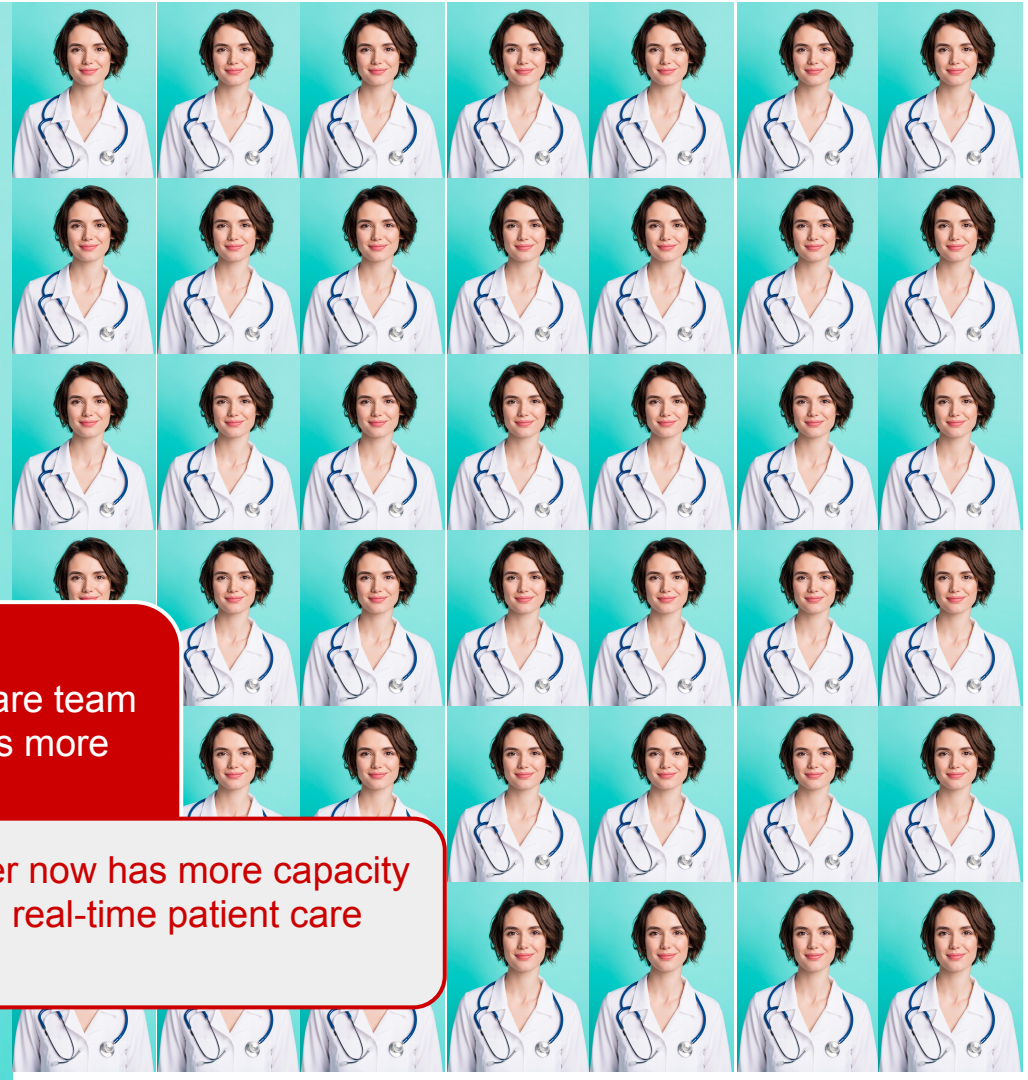

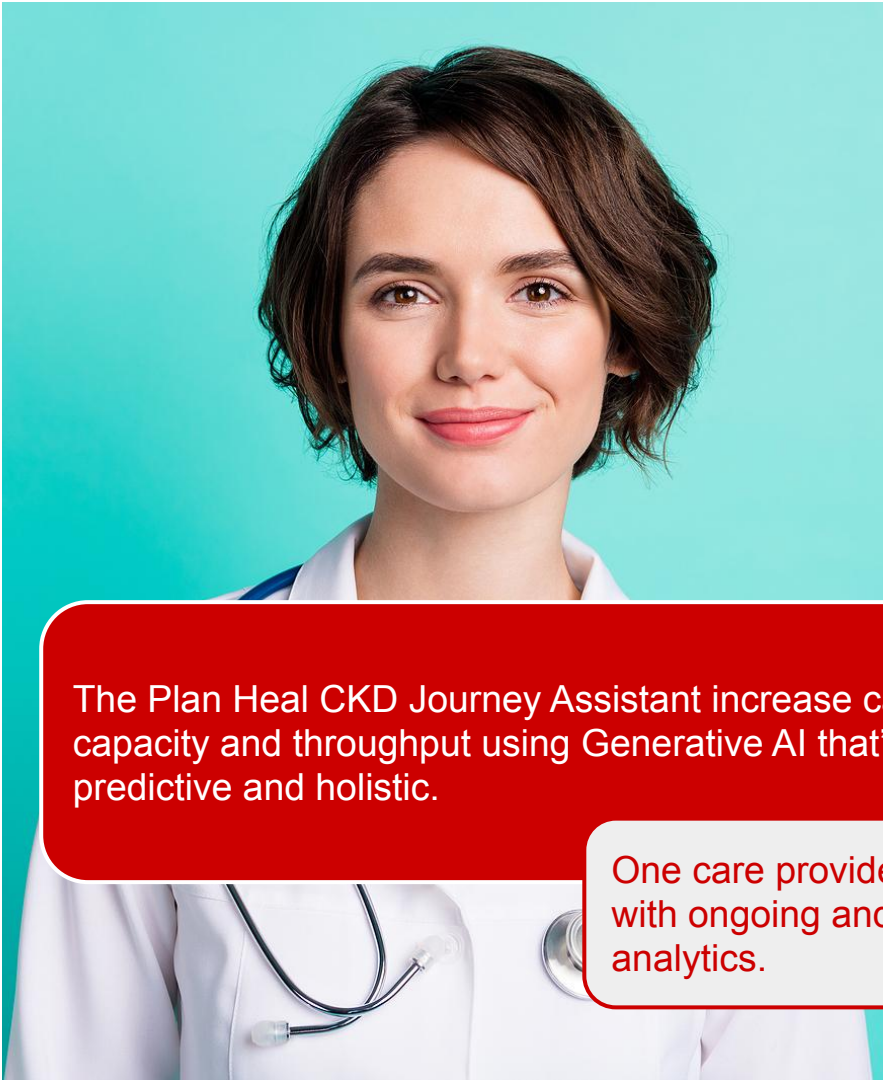

How CKD Journey Assistant Works

Dr. Smith and Amy use the CKD Journey Assistant to continuously monitor Amy's Chronic Kidney Disease more efficiently.

The Plan Heal CKD Journey Assistant increase care team capacity and throughput using Generative AI that's more predictive and holistic.

One care provider now has more capacity with ongoing and real-time patient care analytics.

Amy can now better manage and report her health and increase her health literacy while using any mobile device.

As you manage your Stage 5 CKD ESRD, it's important to report any New Medications you're taking to your Care Team. Are you taking any New Medications- this can include supplements, vitamins, herbs, etc.?

Just now

Yes

Just now

Bot

New Medication Status-

Okay, you can type the names or take a photo of the New Medication(s) bottles you are taking.

Just now

OKAY

Just now

Bot

New Medication Status-

I will wait for you to add the New Medication(s) information.

Just click YES when you have added the information.

Just now

Dr. Smith can now access analytics via the EHR that are more-
Actionable, Predictive, Realtime, and Holistic to support
Amy's unique needs.
