# Plansom®

Let **AI** Help You **Get Work Done**

Adopting AI Is Hard

AI holds great promise, but enterprises hold back. Why?

- AI can cut costs 20–30% and increase revenue 10–15% ([McKinsey](#))
- Yet leaders are skeptical of AI. Only 60% see it as critical to their company's future ([PwC](#))
- The gap isn't technology, it's execution, alignment and trust

How To Make AI Easy For Organizations

To simplify adoption, organizations need:

- Intuitive UI – Minimal training needs
- Quick setup – Get users up and running fast
- Work OS - Connect all your data and apps in one place
- Built-in trust, privacy & security
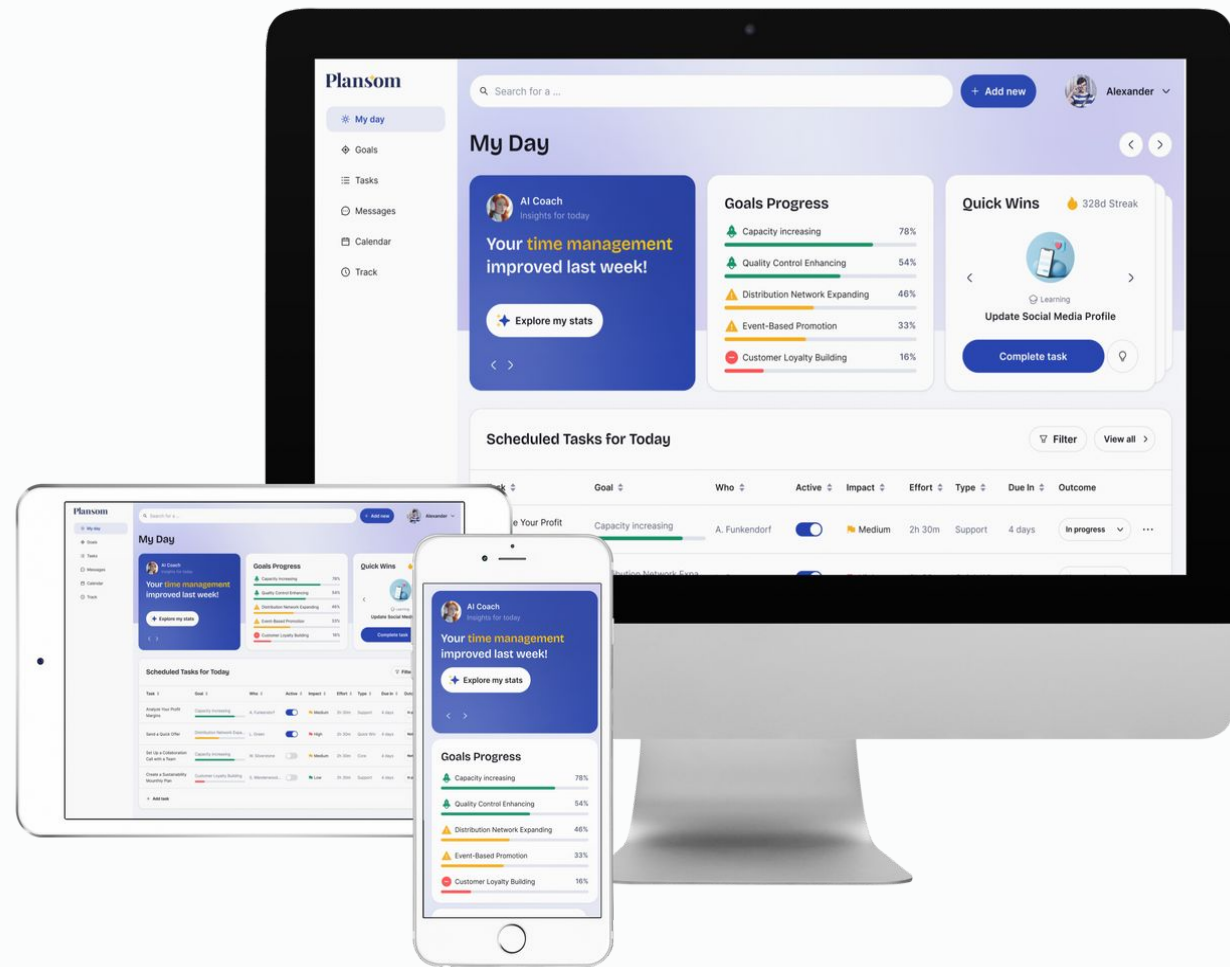

Plansom Makes Using AI Easy

What can Plansom do for you?

With Plansom, just give it your goal, connect your data, and AI Agents will plan, manage and execute your work for you:

- **Set up in under 5 minutes**. Any user can complete their first AI-powered task quickly and easily

- **No training needed.** No IT support. Just an app that works

Plansom: AI-Powered Work OS

Plansom is designed for enterprises, teams, and individuals:

- **AI Plan:** Generates strategy instantly— no manual planning or prompt engineering required

- **AI Manage:** Automates daily standups, progress tracking, and bottleneck reports — 10x your productivity

- **AI Execute:** "Do It For Me" AI agents save you time by executing tasks

AI Plan: Smart Plans In Minutes

AI agents turn you goals into smart plans instantly

- Generates instant strategy, no manual planning, no tech skills required
- Prioritize tasks by impact and effort
- Breaks big goals into subgoals and tasks for team alignment
- Gain clear visibility on progress

Example: Planning a market expansion? Plansom generates a region-specific rollout strategy with tasks, timelines, and risks pre-mapped.

How to Get Started on Plansom?

AI Manage: Optimize Your Team Performance

AI agents that run your day-to-day work

- Auto-generates daily standups and updates
- Detects blockers and risks in real-time
- Sends monthly performance reports
- Shows top priorities with My Day
- Nudges users with AI Coach

Example: A key deadline is slipping. Plansom identifies the bottleneck, suggests reassignments, and notifies the right people—before it becomes a crisis.

AI Execute: Use AI Agents To Save Time

"Do It For Me" AI agents that executes tasks for you:

- Executes tasks like reports, research, summaries and more.
- You stay in control with Human-in-Loop (default mode)
- Use Fully Automated for low-risk, recurring tasks
- Choose Manual Mode when no AI execution is needed
- Logs every step and output
- Reusable via templates

Example: Running audits? AI reviews documents and logs results automatically, every month

Plansom Is Engineered For Trust, Privacy and Security

- Your data is kept completely separate from others (true tenant isolation)
- Everything is encrypted — in transit and at rest
- AI processes your data in real-time and never stores it
- Built-in safeguards prevent data leaks and prompt attacks
- Your data is never used to train or improve AI models
- Only authorized team members can access what they need (role-based access)
- Every action is tracked with full audit logs
- Personal and sensitive data is automatically hidden when needed
- You control encryption with your own keys (BYOK)
- Option to run Plansom entirely on your own servers
- You set the rules — from data retention to privacy controls
- GDPR Compliant - EU Company
