

# PLEXHOSTED

# PLEXHOSTED | CMMC LEVEL 1 READINESS ASSESSMENT

## SCOPE OF THE ASSESSMENT

1. Review of Microsoft 365 tenant configuration
2. Identity and access management (IAM) evaluation, including MFA, roles, and conditional access
3. Intune and device security posture check
4. Baseline mapping to all 17 CMMC Level 1 practices
5. Review of Secure Score and recommended improvements
6. Delivery of a formal written assessment report

## ASSESSMENT DELIVERABLES

- ✓ Summary of findings mapped to CMMC Level 1
- ✓ Practical remediation roadmap with priorities
- ✓ Recommendations for improving Microsoft 365 security posture
- ✓ Optional guidance for preparing for CMMC Level 2 or NIST 800-171

## CUSTOMER RESPONSIBILITIES

- Provide administrative or read-only access required for the assessment
- Participate in a discovery call
- Share relevant documentation (optional)

## OVERVIEW

The CMMC Level 1 Readiness Assessment helps organizations evaluate their current security posture against the 17 foundational practices defined in CMMC Level 1. This assessment focuses on safeguarding Federal Contract Information (FCI) within Microsoft 365 and Azure Active Directory (Entra ID) environments. It provides a clear understanding of compliance gaps and actionable remediation steps.

## DELIVERY TIMELINE

This assessment is delivered remotely and is typically completed within 30 days, depending on environment size and customer availability.

## ABOUT PLEXHOSTED

PlexHosted provides managed security, compliance, and cloud services for Microsoft 365 environments. Our team supports organizations across regulated industries, including healthcare, finance, education, nonprofit, and government sectors. We help organizations strengthen security, reduce risk, and prepare for compliance audits.
