

QPunch

Smart Project Management

UNITE, COLLABORATE AND COMMUNICATE
EFFECTIVELY TO DELIVER PROJECTS ON
TIME AND WITHIN BUDGET

A PRODUCT OF

PMOBytes

PMOBytes® vision is to be the best in making project management simple for professionals worldwide.

We started in March 2019 with a mission to provide professionals with project management trainings for industry best practice certifications. By 2021, we trained more than 1000 students and due to our training it helped many in proceeding to the next desired level in their occupations. We then diversified and started a consulting arm for the organization which aimed to practically apply our expertise and experience in real life projects. We successfully delivered many projects for clients like Qatar National Bank, Ooredoo, The Group, Ministry of Interior (Qatar), Cisco, Google and Microsoft Qatar.

We are now striving to be the best one stop shop for all project management office needs across the globe. And to achieve that we have created our own product QPunch - Smart Management Solution which is blended with real life experience exploring different industry standard methodologies. QPunch is created out of a passion and provides features required to improve outcomes of projects and help organizations achieve better overall return on investment. Its unique and provides a methodology which is hybrid and support all industries program, project and portfolio management. We are growing and have a dedicated team to support the product and we keep enhancing it based on learnings we receive from our clients.

We strive to make things simple for our clients to succeed which makes us succeed.

CEO and Founder

Transforming the way you manage projects!

QPunch is a Smart Project Management application that instantly reports relevant information in real time as projects are progressing and teams are encountering challenges.

Our mission ensures that teams aren't divided in Silos. In other words; planning, execution and reporting are linked in a such a way that teams will maintain continuous collaboration.

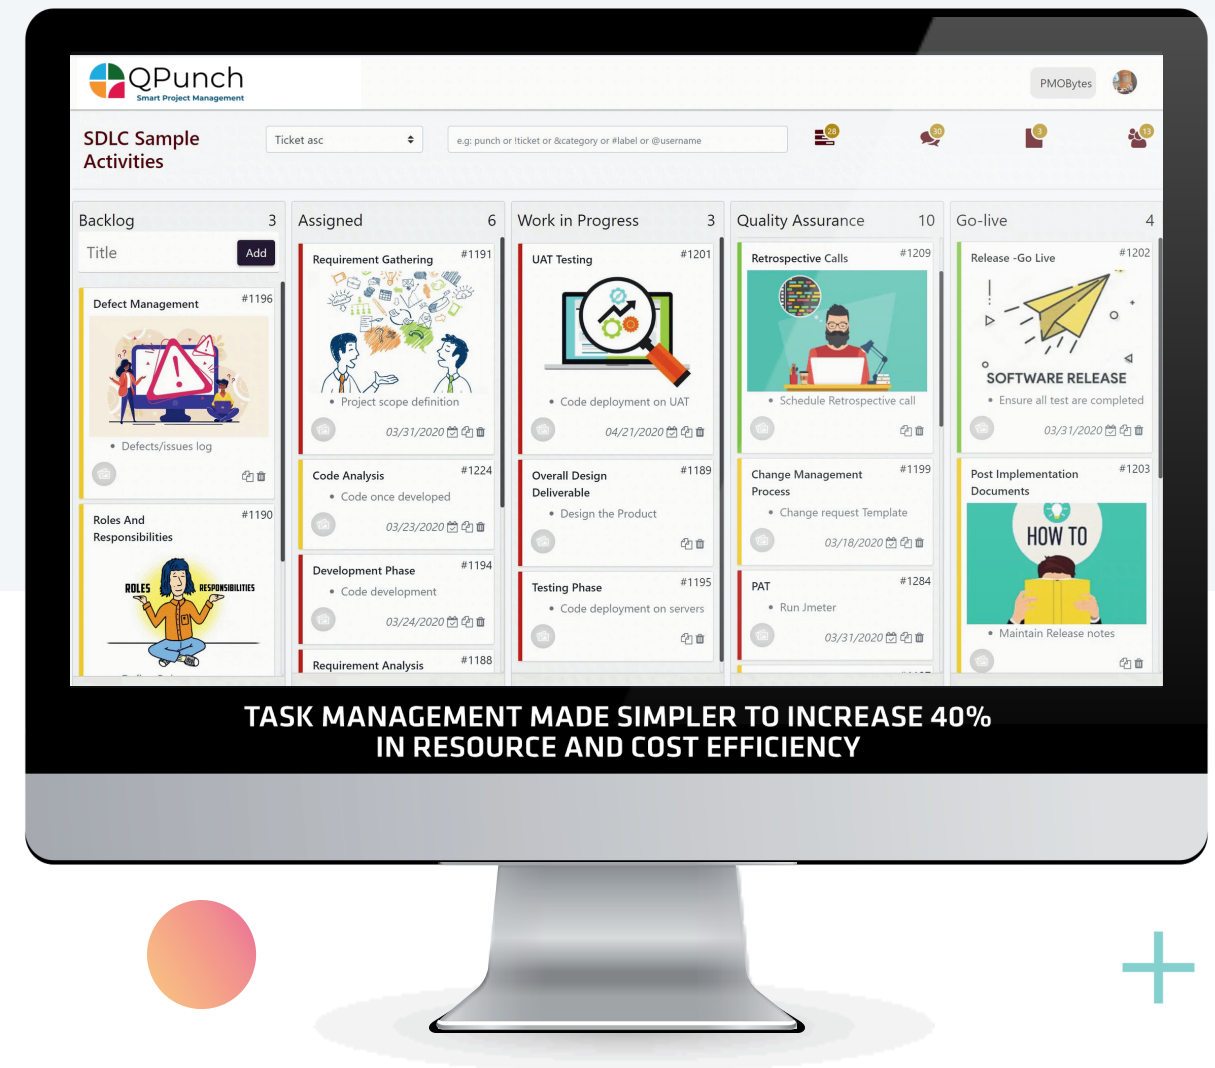

It's a tool that does it all for all kinds of projects including

- Portfolio Management
- Program Management
- Project Management
- Task Management

What's Unique?

QPunch supports Agile and Waterfall Methodologies and can work as a hybrid solution to support entities who are trying to be Agile

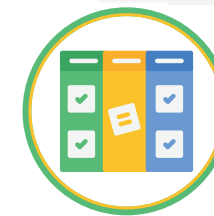

Informative Dashboard

Single consolidated view to know all projects overall status at any particular instance.

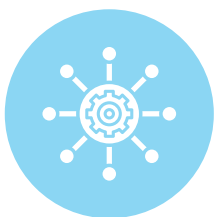

Gantt Charts

Advance scheduling of all the project activities to set appropriate dependencies and define overall timeline.

Kanban Board with Graphics

Enabling team collaboration with Visual representation of all activities.

Integration

Virtual meeting integration to zoom, MS teams etc, Email notification to users, Chat messaging to #WhatsApp.

Localised Templates

QPunch is generic to all project types and provides standard activity templates for users to have a start point.

Time-Sheets

Know how your team is occupied to balance the overall workload and increase work productivity.

Kanban Board

QPunch works based on the Kanban Board method enabling team collaboration with a Visual representation of all activities to every project stakeholder

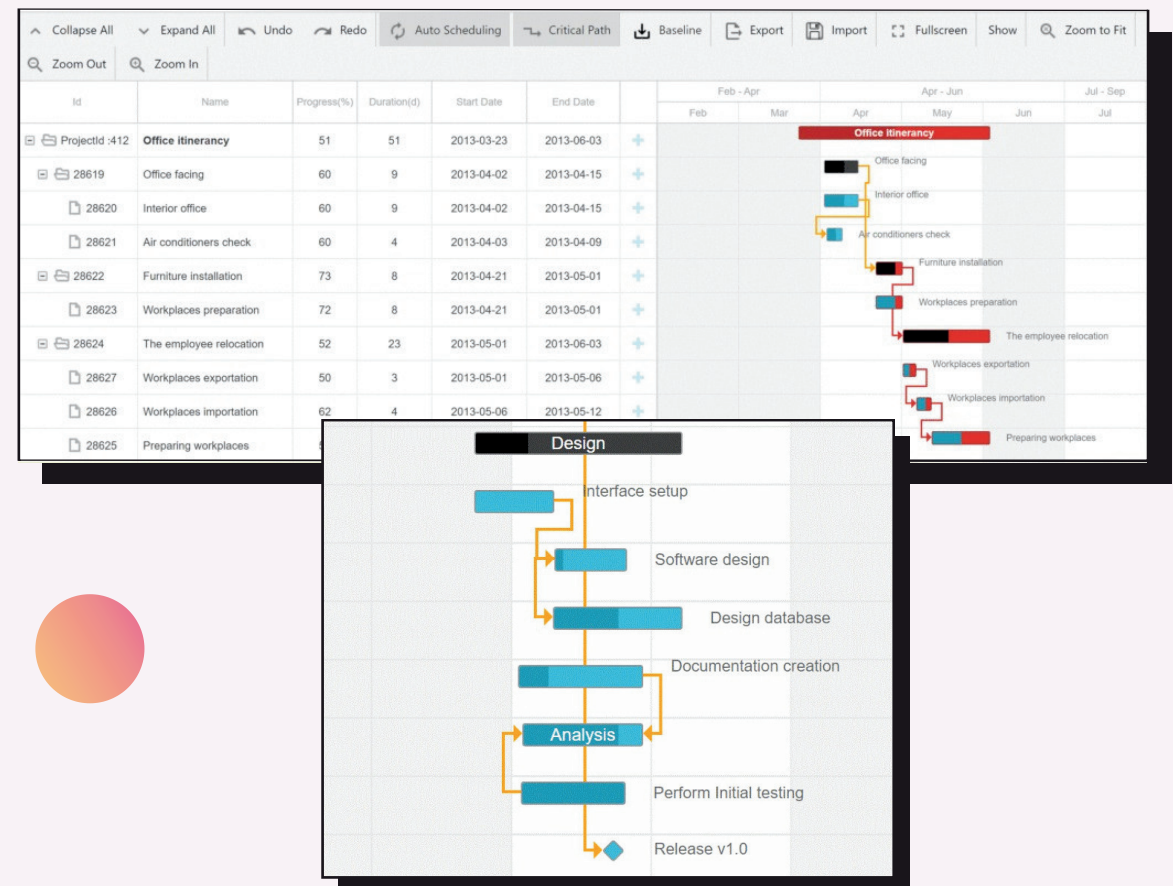

- Easy team activity assignment
- Progress Transparency for users
- Define Priority based on Labels
- Categorize tasks for better sorting and reports
- Know when each activity will be completed

Gantt Chart

QPunch allows advance scheduling of all the project activities to set appropriate dependencies and define overall timeline Timeline to know what activity was done when to enable traceability

- Critical Path Analysis
- Setting baselines
- Analyse Planned vs Actuals
- Seamlessly import activities from MS Project/Excel or Primavera
- Define all types of dependencies (FS, FF, SS, SF)
- Export Gantt to Pdf or MS Project / Primavera

AI Feature

QPunch's AI-powered feature analyzes your project data, past tasks, and current workload to suggest relevant and timely tasks. By automating task creation and prioritization, you can save time and focus on strategic work.

- Automates description generation.
- Ensures uniform format and style.
- Minimizes errors in details and dependencies.
- Accelerates task creation process.
- Leverages insights for optimized workflows.
