MICROSOFT OPENAI HANDS-ON | FROM VISION TO PRODUKT

pmOne | People minded. Data driven. AI based.

Hands-on

What do we want to achieve?

- Concept development for your use cases (e.g. from the executive assessment)
  - Solution architecture that integrates into your IT landscape
  - Definition of processes with OpenAI integration
  - Definition of the interaction between man and machine
- **Bringing ideas to life** (hackathon, PoC)
- pmOne brings along a ready-to-use Azure environment (CSP)
- Better assessment of use cases in terms of feasibility, economic efficiency and
- Definition of success criteria

The pmOne Approach

- Follow-up of the Exec Assessment results (or own ideas)
- Targeted 1on1 discussions to clarify open questions and define goals and success criteria
- Technical implementation of initial use cases (in your cloud environment or the one provided by pmOne)
- Focus on "working" examples
- Presentation of the results to decision-makers
