

Is Your Microsoft Environment Ready for AI?

AI Readiness Assessment

Before deploying Microsoft Copilot or other AI tools, organisations must ensure their **data, governance, and security foundations are ready**. ECLEVA's AI Readiness Assessment evaluates your Microsoft tenancy to determine whether your environment can safely support AI technologies across Microsoft 365, Dynamics 365, Azure, and Power Platform. The assessment identifies **risks, governance gaps, and technical improvements** required to confidently adopt AI at scale.

What We Access

What You Receive

Following the assessment, **ECLEVA** delivers:

- ✓ A **technical AI readiness score** across key security domains
- ✓ A **detailed gap analysis** identifying governance and security risks
- ✓ A **prioritised remediation roadmap** for improving AI readiness
- ✓ Clear guidance for safely enabling **Microsoft Copilot and AI solution**

The Outcome

Organisations gain a clear understanding of:

- ✓ Whether their Microsoft environment is ready for AI adoption
- ✓ What governance and security gaps must be addressed
- ✓ How to safely enable Microsoft Copilot and AI tools
- ✓ The steps required to scale AI securely and confidently
