

Microsoft 365 Security & Compliance Assessment

Overview

Cybersecurity threats are growing more sophisticated, and organizations can't afford misconfigurations, blind spots, or underutilized security tools. While many businesses already invest in Microsoft 365, they often struggle to maximize its built-in security and compliance capabilities.

POA Solutions delivers a comprehensive security and compliance assessment that evaluates your overall security posture, identifies risks, and provides actionable recommendations. We combine general security controls assessment with a deep dive into your Microsoft 365 environment—covering governance, data protection, identity, endpoints, and incident response. The result is a clear roadmap to strengthen defenses, close gaps, and optimize your Microsoft 365 investment.

Vision

- Holistic Security Posture**
Assess both general IT security controls and Microsoft 365-specific tools for a complete view of risks.
- Actionable Insights**
Deliver a prioritized roadmap with practical recommendations tailored to your organization.
- Optimized Microsoft 365**
Ensure you get maximum value from your Microsoft security investments by aligning usage with best practices.

Key Services & Deliverables

Service Area	What It Delivers
General Security Controls Review	Assess baseline security across governance, compliance, network, applications, and incident response.
Microsoft 365 Security Environment Assessment	Detailed review of Microsoft 365 tenant, configurations, and policies to uncover gaps and risks.
