P.AI Chat About

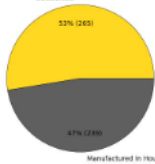

12:57

Number of products manufactured in house and number of products out sourced

P.AI 12:57

- The data shows that there were **239 products manufactured in-house** and **265 products outsourced**.
- The number of products manufactured in-house is lower than the number of products outsourced.
- The difference between the two categories is **26 products**.
- It is important to note that the data does not provide any information about the reasons behind the decision to manufacture in-house or outsource.
- Overall, the data suggests that a larger number of products were outsourced compared to those manufactured in-house.

Number of Products Manufactured vs Outsourced

Category	Percentage	Count
Outsourced	53%	265
Manufactured in House	47%	239
