

A modern intranet designed to inform and engage all employees.

“90% of traditional intranets fail because of a lack of engagement features, low customization capabilities, and communications inefficiency”

For Comms & HR

### Targeted communications

Communications are targeted based on employees' roles and preferences to make sure everyone receives information that's relevant to them.

### Employee engagement

Powell Intranet is designed to give every employee a voice in company culture. It is built with engagement buttons and features to help everyone participate.

### Gamification

At Powell Software we think fun is a key factor to intranet success. That's why our interface is gamified to encourage employee involvement, and people can earn points by doing so.

### Inclusivity

We help HR and Comms Managers ensure that everyone, from office workers to those on the frontline, is informed and aligned. Powell Intranet is accessible from your browser, Teams, or mobile app – even for employees without Microsoft 365 licenses.

### Hybrid work ready

People want to work remotely or come to the office. With FlexDesk employees can hot-desk and book their desks for in-person days.

2x

More adoption than traditional intranets

100%

Targeted information & included employees

+87%

For IT Teams 

## Ready-to-use intranet

A predefined intranet with a rich catalog of templates for all departments: onboarding, employee advocacy, news, ideation, desk booking... Accelerate the time-to-value of your Intranet.

## Tailored, scalable & open

Our core engine makes it easy to customize, deploy and update your intranet at scale with your evolving needs, even for multilingual and multi-site organizations. Connect your Microsoft and 3rd party applications (Power BI, ServiceNow, Workday, SAP...).

## Based on Microsoft 365

IT managers can rely on Microsoft security, modern experience, and updates. All data remain in your Microsoft 365 tenant. Maintain it with no costly custom developments.
