### What does the two week offer entail :

- Kick off meeting - An initial meeting with the customer to understand their existing organizational structure
- Requirement gathering -
  - a) understand the existing business processes
  - b) identify KPIs that must be tracked
  - c) identify and document data sources like databases, spreadsheets or any other system
  - d) understand any data transformation or cleansing requirements
  - e) understand user roles and access levels
- Analyse the requirements gathered
- Identify areas where Power BI can help visualize and speed up the decision-making process.
- Create a high-level document on the various reports/dashboards that can be developed.

## Microsoft Centre of Excellence

At Power Centre, Microsoft technologies are used and harnessed to their fullest extent for greater efficiency in day-to-day operations.

- 100% on Cloud - All our servers and services are on Azure Cloud with backup solutions and Azure DR
- All our employees are on M365 E5 plans with all workloads configured
- Teams & SharePoint are extensively used as collaboration tools
- Security – Almost all Microsoft security products have been implemented for all round security
- Power BI Dashboards – to track internal metrics
- Microsoft CRM is used for sales management
- Microsoft Dynamics 365 Business Central is used for all billing & financial processes

This also means that the team at Power Centre has hands on experience in dealing with the implementation of these technologies in real life situations.
