

Windows Virtual Desktop

This Microsoft Azure service is designed to provide users with secure access to their own desktop from anywhere, via any device.

Your business data is completely contained within the environment and regardless of the device it is accessed from, no data will ever be on that device.

- ✓ Secure Access
- ✓ Work from Anywhere
- ✓ Data Privacy Compliance
- ✓ Scale Up, or Down on Demand
- ✓ Simple Fleet Management
- ✓ Same Desktop, From Anywhere

What is Windows Virtual Desktop?

Windows Virtual Desktop, runs on Microsoft's Azure platform, providing 'virtualised desktops and applications in the cloud. This gives the end user the ability to work from the same desktop and applications, securely, from anywhere in the world.

Regardless of your device type (Windows, Mac, iOS, Android or any other device with an HTML5 web client) bring-your-own-device (BYOD) and remote connect to your enterprise experience with Windows Virtual Desktop. With Windows 10 multi-session, you can run multiple concurrent user interactive sessions easily with the same deployment for more cost efficiency.

Access Windows 10 desktop and apps from anywhere, on any device.

- Deliver Windows 10 desktops on any device, anywhere
- Built-in intelligent security
- Deploy and scale in minutes
- Reduce cost using existing licenses
- Leverage the seamless Microsoft Teams and Microsoft Office experience
- Deploy and scale quickly with Azure portal
- Securely store all of your employee and company data in Azure instead of local desktops
- Leverage Azure security offering such as Azure Firewall, Azure Security Center, Azure Sentinel and Microsoft Defender ATP for end-to-end security from the endpoint to the apps
- Take advantage of Windows Virtual Desktop compliance certifications, including ISO 27001, 27018 and 27701, PCI, FedRAMP High for Commercial and HIPPA
