Our experts are here to help you solve key challenges such as:

- Generating value with proactive insights
- Personalise every customer engagements
- Build new agile business processes
- Deliver always available services to any device
- Managing financial risk and reducing fraud

POWER 
INSURANCE

Empowering intelligent insurance.

Insurance organizations are redefining their businesses due to threats from traditional and non-traditional competitors, increasingly stringent regulatory requirements, changing customer expectations, and the overwhelming number of claims resulting from catastrophic events.

In this new reality, how do you envision the future state of your organization? Build your transformation strategy with Microsoft Catalyst, a proven and powerful approach to innovation.

Let's ideate together

As part of Catalyst, meet with our experts and run an envisioning workshop, where we can ideate together using design led thinking concepts and jointly define how to enable the digital transformation of your organization.

This one-day briefing starts with a review of your business objectives, followed by mutual discovery and visualization of solution capabilities, ending with a clear, actionable picture of how we can help you reach your business goals.

How PowerObjects can help

PowerObjects delivers end-to-end business transformation and strategic application design-and-builds throughout the Financial Services. PowerObjects is a leader in delivering Microsoft Business Applications through unparalleled offerings of service, support, education and add-ons.

What is Microsoft Catalyst?

Build, plan, and execute business transformation strategies with a proven, innovative approach from Microsoft Catalyst—an envisioning and planning program that employs Microsoft Dynamics 365, the Microsoft Power Platform, and the Microsoft Cloud. Your business transformation starts with an I.D.E.A.

Start by finding the transformation strategy that's right for you. Define and prioritize your strategy using development activities, then foster ideation and drive decision making with an envisioning workshop.

Inspire

Imagine a future state solution for your business

Design

Discover what's possible by aligning technology investments to business goals

Empower

Empower others in your organization to see the value

Achieve

Achieve business outcomes and improved customer experiences

Envisioning Workshop

Business Value & Solution Assessment

Solution Demonstration

Transformation Plan

PowerInsurance

Built on Microsoft Business Applications, PowerInsurance is a fully extensible data model framework to roll-up live customer account information, suggested actions, cases and other personal information into a single view which can accelerate the delivery of front-office process such as policy enquiries/changes, claims management and new business sales etc. Designed by insurance experts based on years of experience within the industry, the data model enables insurance firms of all types to provide quick and modern customer engagement strategy through an integrated front-office platform, whilst also providing opportunity to diversify into new products and services, upsell/cross-sell, gain deeper insights into risk profiles and deliver further process automation. It all works together to deliver an insurance solution that increases revenue, reduces operating expense, helps mitigate risk, and accelerates deployment.
