# Endpoint Manager – Implementation Framework

## Structured Adoption Framework

**Phase 1** – Ascertain what matters to the business and create a road map to achieving the organizations goals.

Solution Alignment

**Phase 2** – The framework within which the services and supporting processes can be developed and delivered.

Service Definition

**Phase 3** – Build and configuration of technology components with appropriate testing prior to wider adoption.

Functional Readiness & Pilot Phase

## Rollout and Operational Maintenance Framework

**Phase 4** – Pro services and support to drive business wide adoption.

Wide Scale Adoption

**Phase 5** – Support and services to help with longer term needs.

Internal Operational Management

Shared Operational Management

Managed Service Operational Management

# Modern Management Adoption Framework
