- Marketplace** 6+ Co-Sell Services

Microsoft Partner

- Gold Security
- Gold Cloud Platform
- Gold Windows and Devices
- Gold Cloud Productivity
- Silver Enterprise Mobility Management

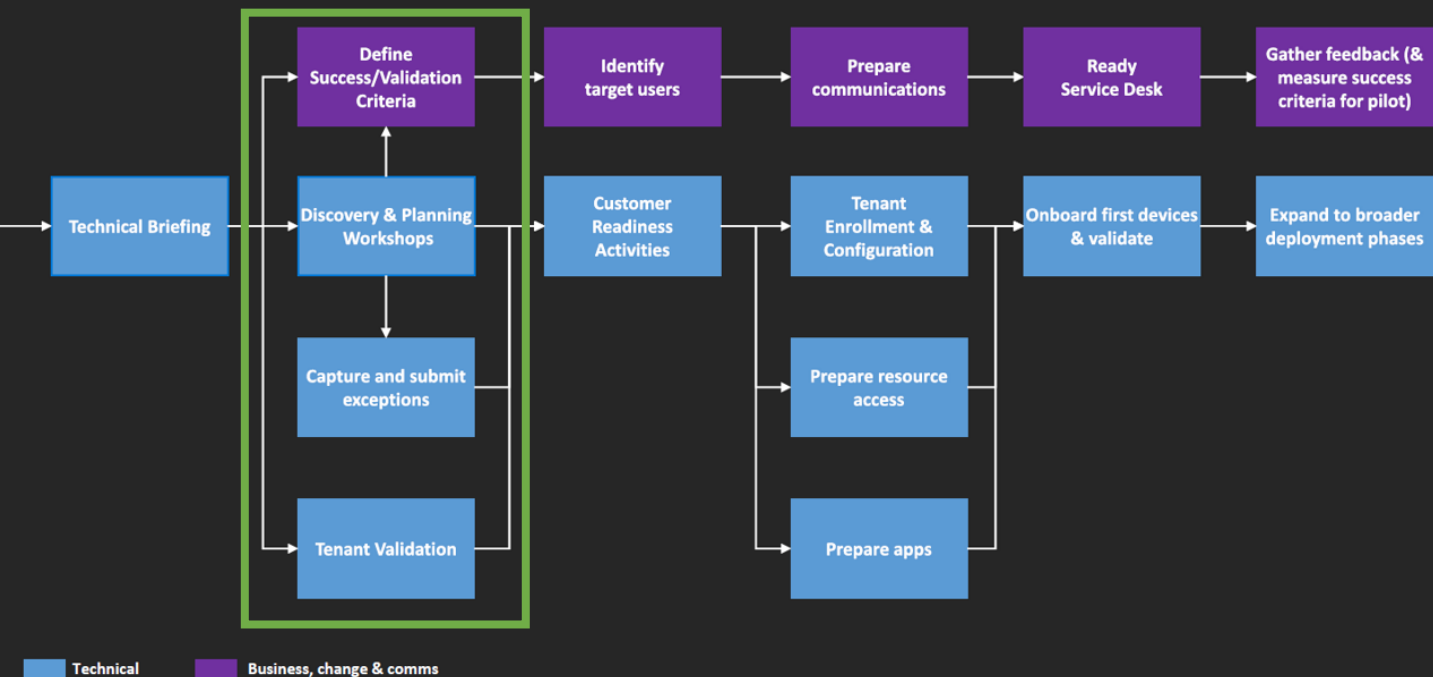

MMD Readiness Assessment

Assessment Workshop

The MMD Customer Journey

The first step on the MMD journey is certainly the most important. The success & validation phase outlines where the MMD service can benefit the business, but more tangibly, frame the journey from current state to future state.

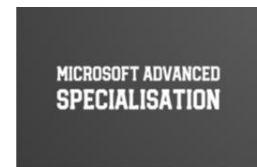

Microsoft Managed Desktop poses a world of opportunity for customers seeking strong Managed EUC & Device Lifecycle services.

To support this, we've created our MMD Readiness Assessment. Which includes both a business and technical review of current state, Microsoft Managed Desktop requirements and a gap analysis, priority and effort matrix to map your journey.

We also provide flexible remediation and support services to Fastrack these areas, such as Azure Active Directory, Windows Lifecycle, Application Packing, Endpoint Management enhancements, Windows Hello, OneDrive for Business, User profiling and IT Operations & Documentation processes.

Customer Wins

[Details here](#)

Devon County Council

Well on their way to Microsoft Managed Desktop Service, they needed tactical help to finalise key technical considerations before service go-live.

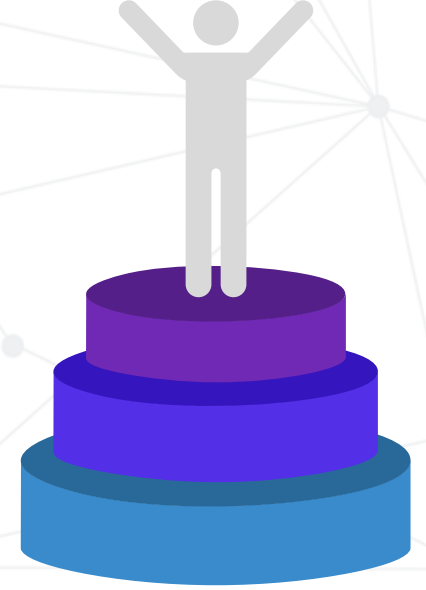

UK Atomic Energy Authority

Modernising EUC was on the mind and MMD presented a bigger picture answer. So we ran readiness workshops to technically map their journey.

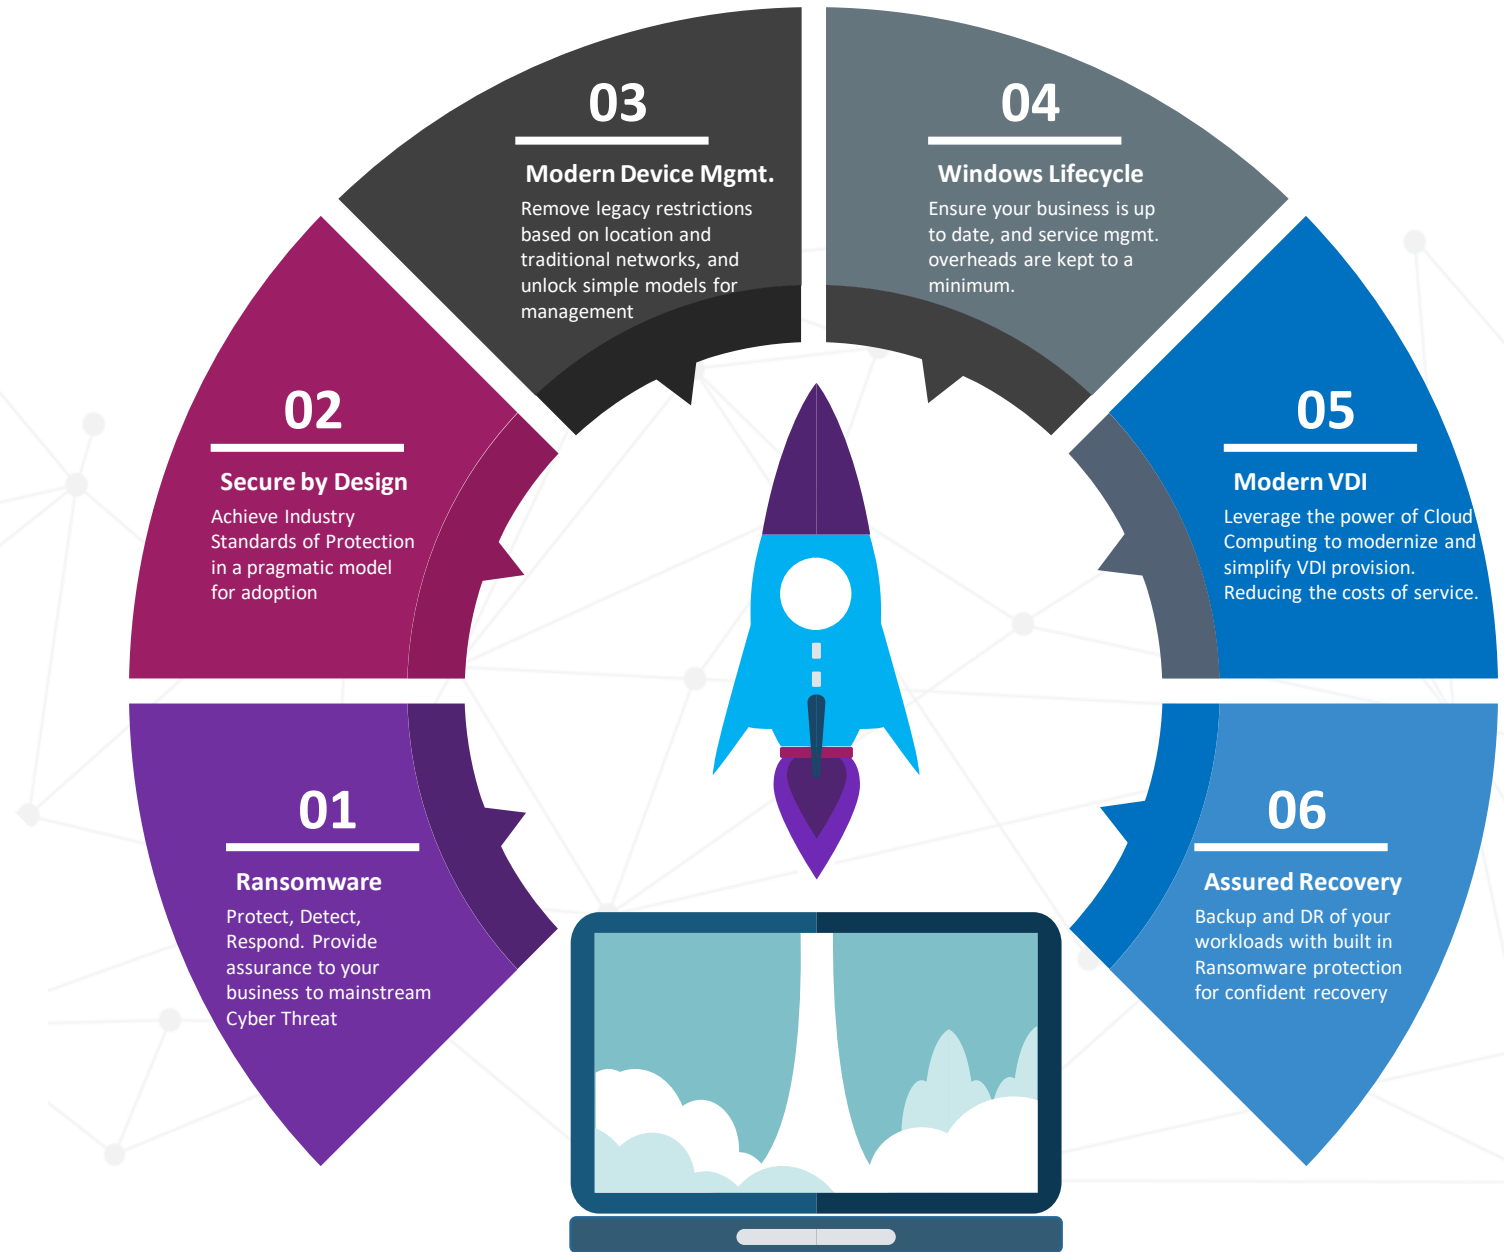

Reckitt

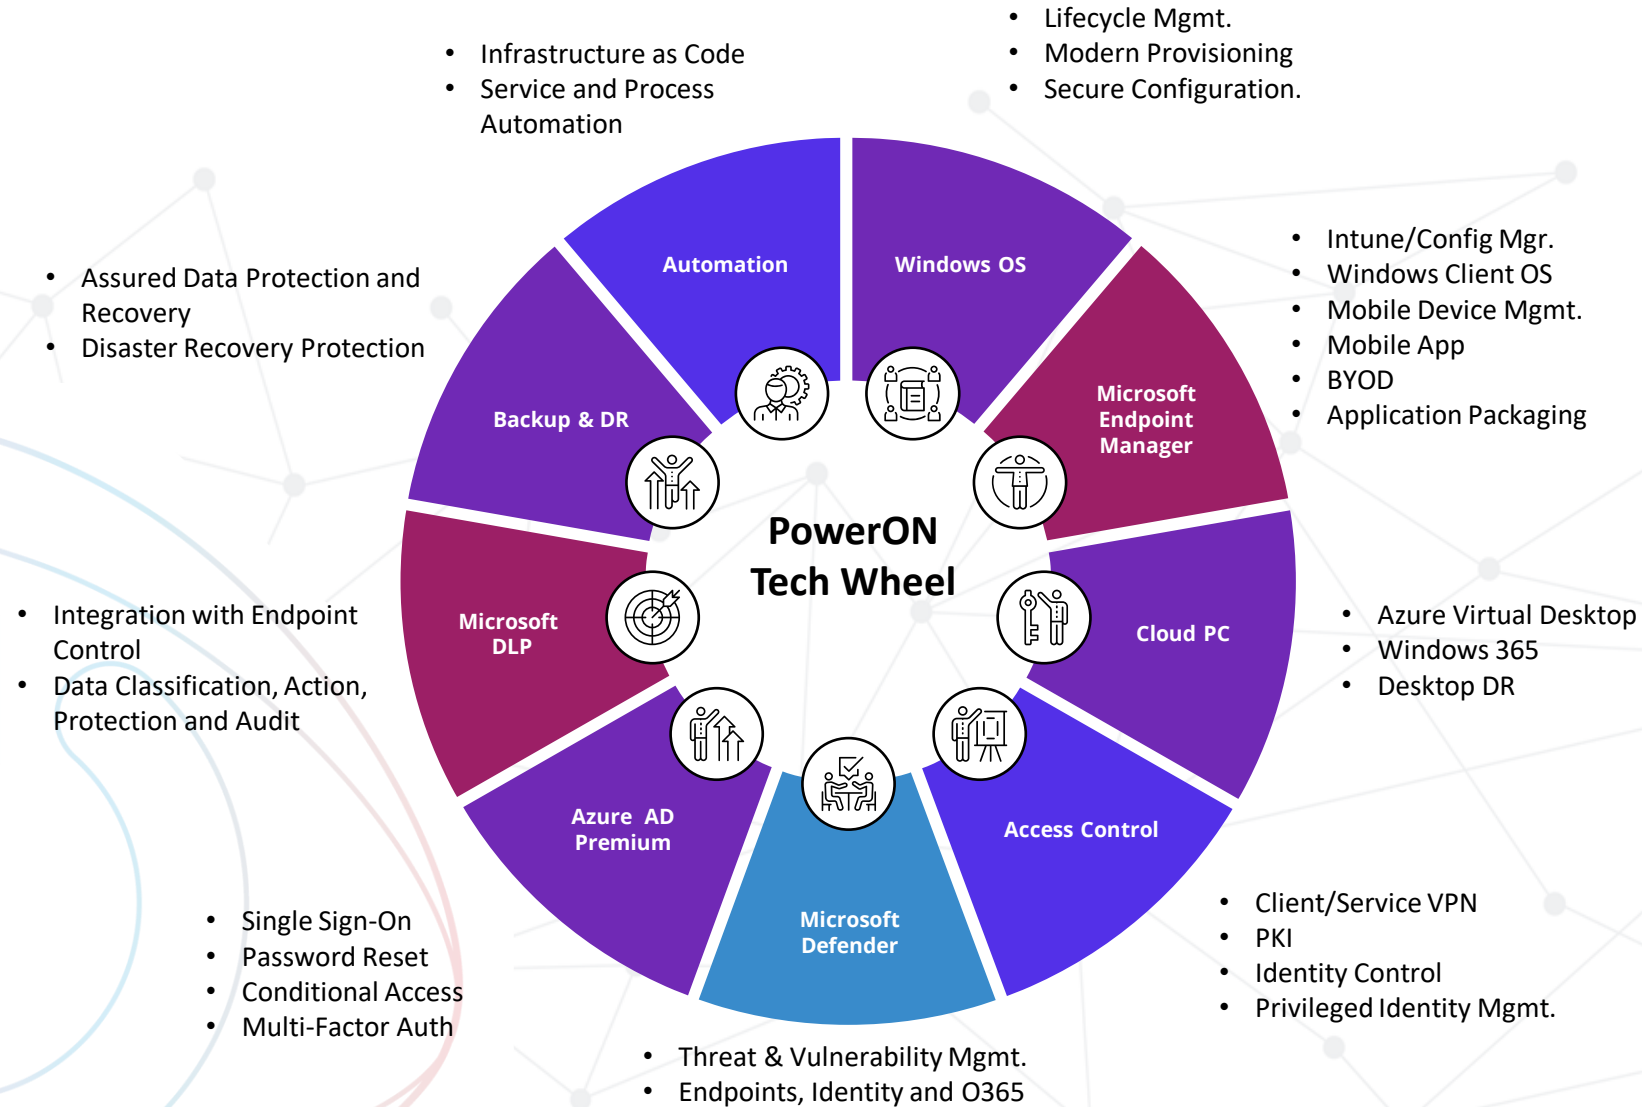

There was a 12-24 month strategy to adopt MMD. But upgrading core infra, Identity, Windows & Endpoint tools to do so, was no easy task. So we mapped and delivered a project to ready them.
