Windows 11 Adoption Assessment

2 Part Workshop

Windows Assessment Pathway

Phase one – Business Level Assessment

- Business view of Windows 11 features and benefits
- Live analytics of your device estate readiness for Windows 11
- High level recommendations

Phase two – Technical Readiness Assessment

- Interactive workshop and technical review
- Adoption plan for single/blended estates of Windows 11, W365 & AVD
- Considerations around associated tech (apps, settings, infra, security & more)
- Recommendations & findings to adopt (and manage) these technologies

How will Windows 11, Windows 365 and Azure Virtual Desktop be used in your business?

Windows 10 has paved the way for Windows 11, Windows 365 and Azure Virtual Desktop. These new platforms create new business, IT and end user options, but require consideration, planning and ongoing management.

As with any new release (aka Windows 11 or Windows 365), teams need to review, assess, test and validate before rolling out.

Further optional services and Assessment details [available here](#)

Windows 11

Windows 11 is here - but when and how are you going to adopt it?

Windows 365

W365 is pushing a new wave of Cloud PC - understand if and how it fits your needs.

Azure Virtual Desktop

AVD delivers virtual desktop without the downsides of traditional VDI.
