

Human Resources Templates

The productivity of a company's **human capital** has never been more important, due to tight labor markets and persistent inflation. Enterprises must empower their employees to do their best work in hybrid and mobile environments. Human Resources must be re-imagined and extended to meet the new challenges of a global, diverse and hybrid workforce. The Power Platform templates for Human Resources enable the modern CHRO or VP of Human Resources to recruit, manage, reward, and retain their top-performing talent in our constantly changing business environment.

This initial release is composed of three initial application templates for Human Resources: the **Employee Kudos template** which enables individual teammates to celebrate co-workers for their contributions, the **Employee Awards & Recognitions** template which enables employees & managers to nominate individuals for special awards, and the **Employee Onboarding** template which partners new employees with current employees and mentors to enable new employees to onboard and ramp as quickly as possible. The Employee Kudos template is available today. Awards & Recognitions and Employee Onboarding templates will be available in the near future.

Employee Kudos is one of the most used Power Apps solutions internally at Microsoft. Now every customer can leverage the best practices from Microsoft in their own company. We will continue to release more relevant templates to improve the employee experiences over the course of 2023 for the entire Hire-to-Retire process. More details can be found here

<https://aka.ms/LearnEmployeeKudosTemplate>.

With the Employee Kudos template,

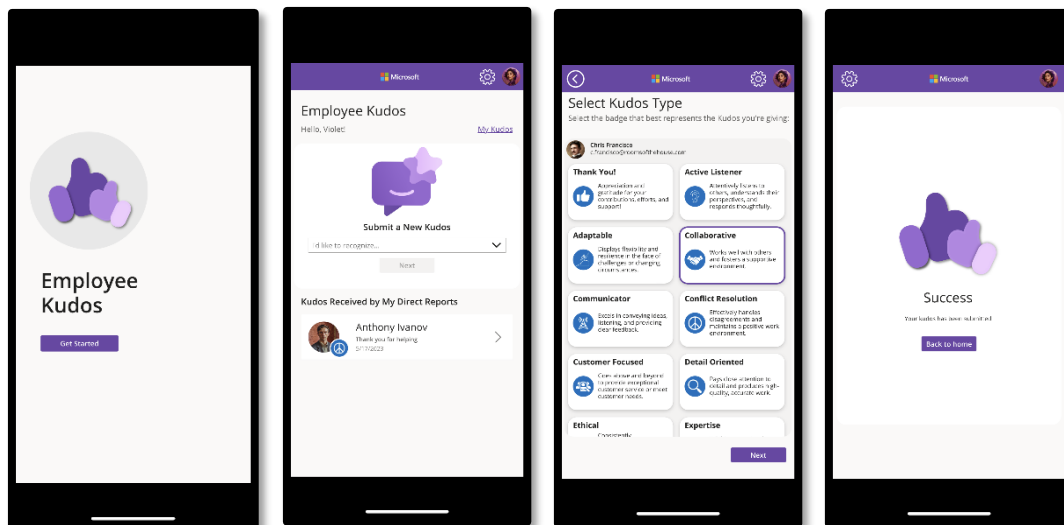

As an employee,

- Recognize your coworkers by sending a Kudos
- Check your Kudos and the ones you sent

As an admin,

- Manage Kudos badges and users

All with easy-to-use interface with data stored in Dataverse. Available for both web and mobile devices.
