

SafeQuard Encrypted Emails (SQEE)

Send & receive quantum-safe encrypted emails between Office365 and Gmail

What our users are saying

"I can finally transmit API_KEYS to my customers in a secure way"

- SaaS administrator

"I like that my financial reports remain encrypted in my mailbox, and I can easily open them with just 1 click. No need to fumble with passwords anymore."

- High net worth investor

About pQCee

pQCee Pte Ltd is a quantum cybersecurity startup. We design and build post-quantum products and solutions to strengthen and protect the \$trillion digital economy against quantum attacks. Please visit www.pqcee.com or contact info@pqcee.com for more details.

About SafeQuard Encrypted Email (SQEE)

SafeQuard encrypted email carries out enterprise-grade quantum-safe encryption on emails. It operates on both Microsoft365 (as an add-in) and Gmail (as a Chrome extension). Key features include:

- Interoperable between Microsoft Office365 and Google Gmail
- Automatic key management, no need for any key exchange or shared passwords between communicating parties
- End-to-end encryption NIST FIPS 203 PQC algorithm (MLKEM) to ensure long-term safety.

SQEE is well-suited for businesses that need to send and receive sensitive information and data (e.g. passwords, activation keys, financial reports, health records, KYC information) using emails with external partners and customers. By doing away with the cumbersome practice for mutual key exchanges or manual sharing of out-of-band passwords, SQEE can scale to millions of users.

Why Microsoft 365?

Save your company money

Microsoft 365 is available as a simple monthly subscription. Avoid large up-front costs for new software while moving the cost of IT from capital to operating expense. And without on-premises servers to run email, websites, and document storage, you can reduce energy costs and save by no longer purchasing new server hardware.

Scale your business quickly and flexibly

Microsoft 365 grows with you on the Microsoft Azure cloud. Adding a new user is as simple as buying an additional license, which allows access to business-critical technology on up to five PCs/Macs and five mobile devices. Microsoft 365 provides many plans to fit the right capability needs and price points for each user in your organization.

Technical support

Your Microsoft 365 subscription comes with 24/7 support from a global network of experts, with one-hour response for critical, service-impacting events.

Financially backed SLA

Get peace of mind knowing your services are available when you need them with a financially backed, 99.9% uptime service-level agreement.

Simplified IT management

Reduce headaches by reducing your IT infrastructure. Content lives safely in globally distributed data centers with continuous backup and disaster recovery abilities.

Key use cases

Business-class email

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

Cloud storage

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

Meet online

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

Collaborate, chat privately

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

Microsoft 365 is a cloud-based subscription service that brings together the best tools for the way people work today. By combining best-in-class apps like Excel and Outlook with powerful cloud services like OneDrive and Microsoft Teams, Microsoft 365 lets anyone create and share anywhere on any device.
