Intune for Windows: 6-week Implementation

Intune for Windows is a configuration service that enables you manage Windows 10 devices in Intune.

Intune transforms the way Windows machines are provisioned, updated, and managed.

Our proven, three-step process is:

- Design – We analyze your current configurations and policies to design a "golden profile."

- Implement – We build policies, profiles and compliance rules in Microsoft Intune and configure Microsoft Autopilot.

- Transfer Knowledge – We deliver as-built documentation and perform training sessions with your Intune administrators so you can take over with confidence
