Why should you **secure** your mobile fleet?

A mobile fleet, whether it's composed of **business** and/or **personal devices** that run on **Android** and/or **iOS,** is a gateway to your company's information system.

Growing **mobile threats**

Phishing | In 34% of phishing attempts, mobile users click on the fraudulent link

Intrusive applications | 61% of mobile applications collect user information

Malware | 10% of mobile devices encounter malware during their lifecycle

Exploitation de l'OS | 81% of mobile devices are running on obsolete and vulnerable versions

Consequences of a **cyber attack**

- Data leakage
- Company image damage
- Service inoperability
- Financial penalty

What Pradeo **helps you achieve**

A mastered **digital transformation** | **Data protection** of personal and company data | More **flexibility** for users | Mobility in **compliance with regulations**
