

App in a Day

This class is designed to accelerate your Power Apps, Power Automate and Dataverse for Applications experience with a comprehensive training in a single day led by a certified Microsoft Partner. In this all-day interactive training, you will learn how to create custom business applications without writing code, leveraging the Microsoft Power Platform technologies. You will learn how to build custom apps that run on mobile devices and share them inside your organization securely.

After this course you will better understand how to:

- Build canvas and model-driven applications for your end users
- Use Dataverse to store business data
- Integrate Power Automate flows to automate approvals
- Meet organization requirements around building line of business applications

Note: This training includes a mixture of lecture and hands-on labs. Attendees should be prepared to follow along and build apps with the instructor with their own Power Apps account.
