# Predica Azure Migration Pack

•

Transform your business with IT that's right for you
Scale as you need, protect your data and increase your business flexibility – with integrated cloud services

# Move your resources to the cloud and discover the endless possibilities of dedicated Azure services for every area of your business

**predica.**

## Challenges

**Customers are faced with typical problems of:**
- Iinflexibility of solutions
- Resource control
- Cost transparency
- Compliance & governance

On-premises infrastructure restricts business agility in terms of capacity and generates cost in maintenance and scalability. A cap on resources may cause difficulties when new business services or solutions are required.

## Ideal Solution

**Extending infrastructure towards:**
- Instant scalability
- Adaptable technologies, compatible with existing solutions
- Cost management and transparency
- Information security

Adopting a SaaS, PaaS or IaaS solution addresses the most pressing business problems, puts companies back in control of their IT and helps improve their productivity and operations.

## Desired Outcomes

**A modern-day IT solutions allow for:**
- Higher ROI
- Better cost control
- Increased business agility
- Accelerating go-to-market strategy

With cloud resources, businesses can reach their potential and gain a competitive advantage on the market. Well-defined and utilized IT resources speed up all operations and allows companies to flexible adjusting to the changes. Time and cost saving IT solutions accelerate organizations growth and increased profitability.

# Cloud technologies can transform your business!
# Our experts can help you get there

**predica.**

## Ready to apply

- We will build with you ready to use Azure environment to effectively manage resources and costs.

## Right path for you

- First You will gain knowledge what the benefits of Azure migration are
- Then we will select the viable workload and plan its move to the cloud
- We will help you prepare and execute first step into cloud
- We'll make sure that right skills and knowledge stays with you

## Next step

- After first workload moved to the cloud, we will help you defined next steps
- You won't be left alone. We are at your service and according to our company rule – we will "make it happen".
- We can provide you with right training and help build enterprise cloud environment!

# Benefits of Predica Azure Migration Pack + Microsoft Azure Platform

We can help you develop your cloud adoption strategy to implement an IT environment that is right for your business needs. With cloud-only and hybrid cloud options, you can choose the set up that is right for you, along with services that will help your business operate better. And with our certified Microsoft experts and MVPs, you are in good hands!

## Solution Alignment

| Scalability | Adjust environment to Your needs | Security |
|---|---|---|
| **Cloud resources are scalable to your precise requirements.**<br><br>Turn your fluctuating demands into an asset.<br><br>Keep your business agile by adjusting your usage instantly and pay only for what you need. | **Go hybrid and retain on-prem environment if you need to.**<br><br>Make use of the cloud on your own terms.<br><br>Full cloud migration is not necessary – you can move only the resources you want, and still integrate both environments seamlessly. | **Microsoft Azure solutions are recognized by authorities in terms of data security.**<br><br>Maintain data security and compliance with regulations.<br><br>Your data is still safe when kept in the cloud. You are able to restrict access, set up permission profiles and keep a secure backup. |

# Don't hesitate and feel free to make first step.
# With cloud technologies we can easily adjust right solution to your business needs

**predica.**

Technology is the backbone of modern business. With the right solutions, you can take your company to new heights. Cost effective, scalable to your needs, secure, easy to implement... Interested?

## What can you achieve?

- Freedom to implement the most appropriate resources at a pace and scale that works best for your business

- A secure environment you can stay in control of

## Why customers use Predica Azure Migration Pack ?

- Consolidate IT infrastructure
- Get IT costs under control
- Keep your resources secure
- Instantly scale up or down depending on requirements
- Set up reliable DR and backup solutions

## Is it reliable? Yes it is !

- Service performance guaranteed by Microsoft
- No on-premises infrastructure required
- Secure access to resources anytime, anywhere

# Digital transformation in manufacturing

**predica.**

Our client is a large manufacturer with high-volume yearly output. However, as a new digital business, the company has envisioned various services built on data collected from their products.

Our client's vision was to have digital services provided in a subscription model to their customers, aside from their current production. The system that provides some of these capabilities is very limited in architecture and scalability and is not able to benefit from new cloud technologies, such as machine learning.

The goals for the project were:

- To replace the current system with a more scalable, stable architecture.

- To utilize new cloud technology to deliver better customer experience, e.g. predictive maintenance.
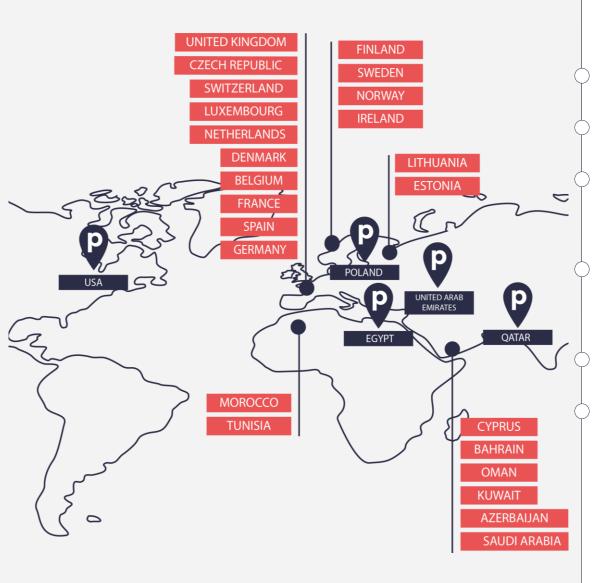

## Win Results

Together with Microsoft we delivered the technology backbone (Azure, CRM, IoT, customer portal) to be able to provide this new digital experience to the client's customers.

The solution collects data from the devices, then analyzes it through Azure IoT solution and display to monitor, predict and correct the configuration/setup of devices. It includes alerting, device profiles and remote management.

Azure Machine Learning provide predictive maintenance service requests managed via Dynamics 365 platform.
