

A complete solution for monitoring, controlling and analyzing your PV-operations

Operational Information at your fingertips

Immediate anomaly detection

Fully understand your assets

Control your portfolio remotely

## Monitor & Supervise

- Instant insight into plant and portfolio operations
- Connect your expert teams for integrated operations
- Act proactive on operation anomalies

## Analyze

- Fully understand your portfolio operation
- Benchmark your asset to achieve optimal plant configurations
- Utilize your data effectively through our Data Engineering API

## Report

- Automate report generation with out-of-the-box templates
- Document grid-code and regulatory compliance
- Design reports flexibly for your needs
- Measure against budgets

## Control

- Make remote control of your plant with PView™ SCADA
- Reduce cost of local manning
- Comply with control regulations

- Robust and field proven technology
- Open standards and APIs
- Integrated plant and portfolio information models
- PV analytics library – ML-ready
- High performance and robust data ingestion, storage and retrieval
- Local SCADA and central fleet control
- Field equipment integration via industry standard interfaces (OPC DA/UA, Modbus, IEC 62056, etc.)
- Efficient and standardized system implementation
- Own your data!

PView™ is a high performance PV O&M system supporting essential plant and portfolio operations.

Maneuver through your assets to identify deviations and take appropriate actions to get the most out of your investment.

PView™ is based upon field proved technology with several thousand installed production-critical systems.

## Our promise to you

Hassle-free implementation

Dedicated team

Immediate value from investment

Harvest value from a system built on 20 years of industry experience

---

*Prediktor is one of our selected Platinum Partners. Prediktor's PView™ enables Scatec Solar to get the most out of our assets; we now have full visibility into our operation – in real time and historically for analytical purposes - both from a single plant perspective and in terms of fleet control. Prediktor has deep competence in PV operations and contributes significantly in our efforts to develop a profitable business.*

- Pål Strøm,  
SVP O&M, Scatec Solar
