SQL Server Migration Consulting Service

on Marketplace

SQL Server upgrade and migration:
elevate your technology infrastructure to the next level

Do you still have an outdated version of SQL Server that is preventing you from fully utilizing your system's potential?

Our migration advice is the perfect solution for you! Our team of highly qualified experts will assist you in transitioning smoothly to a newer version of SQL Server and enable all the new functionalities available to you. Seize the chance to enhance your business efficiency and ensure the safety of your data

Get in touch with us today to have your upgrade project evaluated.

Experience limitless speed, security, and scalability.

Overview

The SQL Server Migration Consulting Service offers assistance in upgrading and migrating one or more SQL server instances through database assessment, tuning, and optimization, streamlining and ensuring a reliable migration process. We provide constant support during all phases of your infrastructure migration.

Re-engineer your database by migrating it to Azure Cloud

Do you need a more flexible and scalable database system for your company? Migrating to Azure Cloud is the perfect solution for you! We provide consulting services to help you move your database from an on-premise data center to Azure which offers numerous benefits of cloud computing:

Reliability and security

Azure ensures data protection through backup systems (disaster recovery) and emergency recovery.

Scalability

Adjust the capacity of your system based on your needs, without the need for hardware maintenance.

Cost savings

A flexible pay-as-you-go payment model allows you to pay only for what you use, resulting in cost savings.

Rely on our expertise to obtain a more high-performing and secure database for your company

Choose our team of experts in SQL Server upgrades and migrations. With their extensive experience in the field, they guarantee a smooth operation that offers the following advantages:

- **Performance Improvement:** A modern and high-performing database system will increase the speed and efficiency of your business.
- **Data Security:** Data protection is a top priority and upgrading your SQL Server database to a newer version ensures excellent data protection.
- **Support and maintenance:** A team of specialists will always be by your side to ensure the continuity of your activities during the process and to keep your system running efficiently and online.
- Don't miss the chance to improve your technology infrastructure with a SQL Server upgrade and migration. Contact us today for an analysis of your server environment.

Assessment process

An assessment process for an instance of SQL Server can offer numerous benefits in the context of upgrading to a new SQL version or migrating to the Azure cloud.
These benefits include:

Identification of critical issues

Through a thorough evaluation of the system, critical issues or limitations that may impact the performance of the SQL server can be identified.

Development of an action plan

Once critical issues have been pinpointed, an action plan can be developed to correct them and prepare the system for the upgrade or migration.

Performance optimization

A detailed analysis of the system can reveal opportunities for optimization, which can be implemented during the upgrade or migration process.

Cost estimation

The system assessment can give an estimate of the costs associated with the upgrade or migration, enabling more informed decisions to be made.

The analysis process can be implemented using various tools and techniques. Therefore, it is essential to rely on a company like **Present**, which is equipped with a team of experts with extensive experience in the field. This ensures accurate evaluation of your server systems.

Present is a well-established reality and a reference point in data processes management thanks to the knowledge and experience gained through delivering Enterprise-class services to its customers

Capacity Analysis

Assessing the performance and capacity of system to determine if it meets business requirements.

Security Analysis

Checking if the system is secure enough to protect against external and internal threats.

Performance Analysis

Identifying any performance issues and highlighting optimization opportunities.

Compatibility Analysis

Checking if the system is compatible with the new version of SQL Server or with Azure cloud.

Who We Are
Values, objectives and vision

Present S.p.A. is a prominent Italian company in the ICT sector that provides cutting-edge technology solutions and consulting services to enterprises and public administrations. Our goal is to promote innovation in business processes. As a major player in the Italian ICT market, we strive to combine innovative technology with the specific needs of businesses to meet their unique requirements.

Our team consists of professionals who specialize in:

Azure Solution Architect Expert

Cloud Architect

**Data Analyst**

Data Scientist

Data Engineer

Business Intelligence Analyst

Database Developer

Database Administrator (DBA)

With their extensive expertise in the field, our team is well-equipped to provide your company with a highly qualified service. We can guide you through the processes of upgrading and migrating your databases with ease.
