PRESIDIO®

Azure OpenAI Rapid Start

Azure OpenAI is a platform that enables enterprises to utilize generative AI for tasks like content generation, summarization, code generation, and semantic search. With this solution, businesses can automate content creation, condense large volumes of text into concise summaries, generate code snippets, and create powerful search engines that understand context. Presidio specializes in building custom solutions using Azure OpenAI, helping organizations integrate generative AI into their workflows securely and privately.

HIGHLIGHTS

Private and secure platform for enterprises to leverage generative AI capabilities.

Automates content creation processes, saving time and resources.

Summarize large volumes of text into concise and coherent summaries.

Generates code snippets or functions to automate repetitive programming tasks.
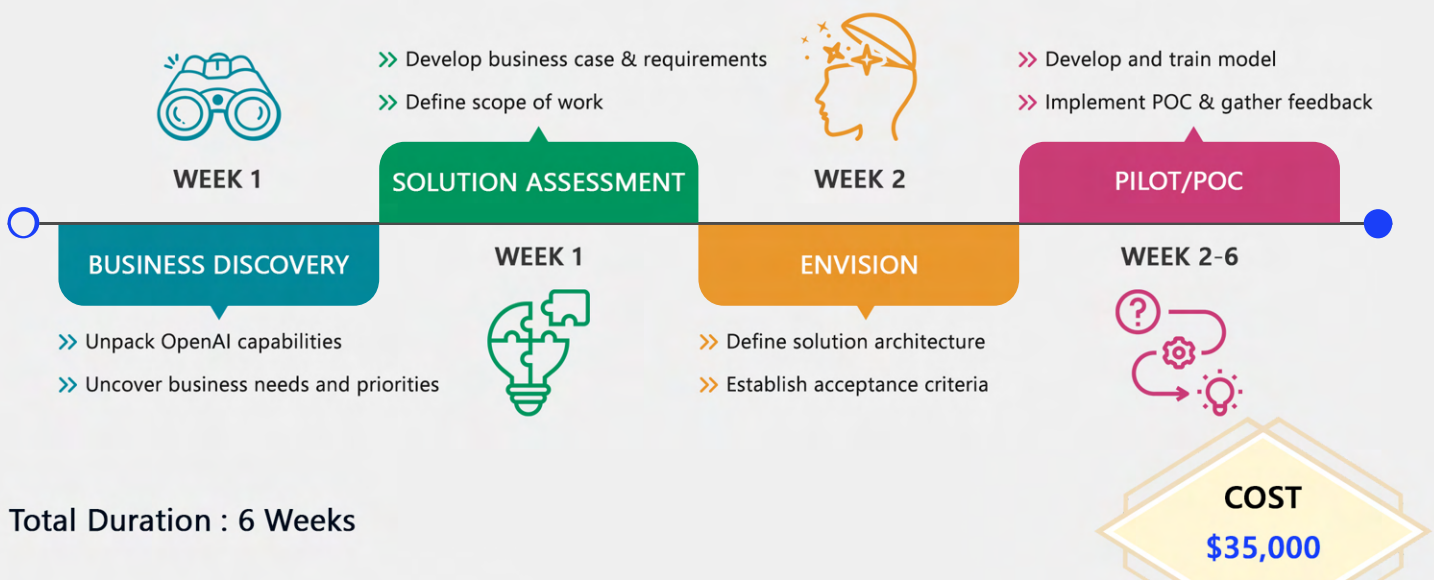

Enables **Semantic Search** engines that understand context and deliver relevant results within the context of user data.

Expertise of Presidio in building tailored solutions using Azure OpenAI technology.

OUR APPROACH TO DELIVERY

WEEK 1

BUSINESS DISCOVERY
- Unpack OpenAI capabilities
- Uncover business needs and priorities

SOLUTION ASSESSMENT
- Develop business case & requirements
- Define scope of work

WEEK 1

ENVISION
- Define solution architecture
- Establish acceptance criteria

WEEK 2

PILOT/POC
- Develop and train model
- Implement POC & gather feedback

WEEK 2-6

COST
$35,000

Total Duration : 6 Weeks

PRESIDIO®

PRESIDIO®

Azure OpenAI Rapid Start

FINAL DELIVERABLES

Business Discovery

>> Comprehensive business discovery report, highlighting key findings, identified opportunities, and potential use cases for implementing Azure OpenAI.

Solution Assessment

>> Solution assessment report, outlining the recommended scope, business case, and estimated benefits of integrating Azure OpenAI into the organization's existing systems.

Pilot/POC

>> Pilot/POC implementation report, documenting the results, performance metrics, user feedback, and the actual pilot implementation or proof of concept of Azure OpenAI within a controlled environment. The report includes recommendations for scaling up and further integration of Azure OpenAI in production environments.
