# DocFlow GED Document Management System

Almost all companies and structures of all sizes are struggling to manage all the flow of documents from different channels and collaborate around these documents.

DocFlow GED is a simple and yet powerful **DMS,** designed from scratch to address real business scenarios, while empowering the **top management** by offering them the necessary tools to manage and share all documents in a structured manner.

The use of **DocFlow GED** as the base of the **DMS** for many of our clients, have proven its efficiency by allowing them to structure and secure their documents.
