

SAP S/4 Show Home Launchpad on Azure

Validate your cloud and SAP S/4 business case with a fully functional “Show Home”

Our Industry “**Show Home**” enables you to engage your teams on what the future will look like using SAP S/4HANA and connected technologies. We will leverage **PwC’s Industry Templates** to accelerate the early build of the solution, including process, personas, data and systems standards.

- ✓ Azure SAP specific LZ deployment
- ✓ Security Framework (Network, OS & Cloud)
- ✓ Site 2 Site connectivity options
- ✓ Media Storage
- ✓ SAP Backup Management
- ✓ PwC Cloud Automation orchestration leveraging Hyperscaler native tooling
- ✓ BYOL license or leverage Demo & Test PwC license.
- ✓ Automated S/4 deployment.
- ✓ PwC Show-Home S4 template deployment ready for S/4 transformation validation

Benefits

- 1** Clarity on where simplification and standardisation for your company processes.
- 2** Richer conversations on scope, data and design choices using your company data.
- 3** Driving your S4 system early to validate your business case early, a real vs paper based validation.

SAP S/4 Show Home Launchpad on Azure
