

Princh sets the standard for printing, copying, scanning and payment in public spaces

Princh is a simple cloud-based solution that allows your users to easily and securely print from their own devices, and intuitively copy or scan their documents. Here are the key features that make us the standard for document services in public spaces:

Integrated electronic payment

Print from any device

Revolutionary Copy & Scan

No user accounts

Self-service solution

No apps required

Asymmetric encryption

Industry-leading security

Multilingual interface

Any solution can write that they are the best - but we want to show you. Experience how our products work via our interactive product walkthroughs, or by watching our on-demand demo videos!
