

# Use your company's services more efficiently by acquiring the best advice

*We save costs and optimize your resources, by migrating your data to an Azure scenario*

## Azure Financial Management

It is a solution that facilitates customers to acquire services, to achieve efficient documentation in contract management in Azure. This process ranges from billing, cost center and subscriptions, in addition Azure Financial Management performs an analysis of all the prices and uses of services in its clients' businesses, with the aim of providing a budget analysis in relation to the use of each.

## Why are customers using Azure Financial Management?

- Provides an analysis of pricing and usage files
- Provides cost structure and optimized scenario simulation
- Save costs and migrate your data

### Flexibility

- Offers workshops for clients, to improve their day-to-day management
- It is open and flexible, supports any operating system, language and tool
- Being a Cloud solution, you will have access from anywhere and from any device with an internet connection

### Optimization

- Use native tools like OMS, Power BI, and Azure Cost Management
- Reduces infrastructure costs and offers data migration to the cloud
- Offers budget analysis in relation to the use of services

### Management

- Analysis of availability and performance of different resources
- Export and generation of alerts, analysis and dashboards
- Business continuity and strategy
