

Customer Trust Starts with Privacy.

Redact, De-Identify and Replace Your Unstructured Data with Private AI

Building privacy into your workflows shouldn't be hard. Private AI makes privacy and GDPR compliance fast, easy, and reliable. We leverage the latest NLP technology to work with unstructured datasets to redact PII, PHI & PCI.

PRODUCTION DATA:

Dear Sir,

My policy number is **049305**. I parked my vehicle at the **Eaton Center**, on **March 13**. A truck hit my car from behind. The back of my car got smashed. What size claim am I eligible for?

Martha McEwan (647-954-3456)

DE-IDENTIFIED DATA:

Dear Sir,

My policy number is [POLICY_NUMBER_1]. I parked my vehicle at the [LOCATION_1], on [DATE_1]. A truck hit my car from behind. The back of my car got smashed. What size claim am I eligible for?

[NAME_1] ([PHONE_NUMBER_1])

SYNTHETIC PERSONAL DATA:

Dear Sir,

My policy number is **52436**. I parked my vehicle at the **Grand Inn**, on **August 24**. A truck hit my car from behind. The back of my car got smashed. What size claim am I eligible for?

Philip Harnock (724-653-8322)

What's to Gain

- ✓ Unlock insights from data sets that were previously untouchable because of privacy concerns
- ✓ Securely store datasets to provide peace-of-mind and establish trust with your customers
- ✓ Achieve privacy compliance quickly and easily without sacrificing downstream model accuracy

Designed for Developers

Deploys as a Docker image in your existing workflows so your data never leaves your environment and is never shared with us. Private AI works from day one and plugs seamlessly into your existing infrastructure.

Nobody Does It Better

We outperform every other redaction service on the market, as verified in independent customer tests:

 **99.5%+**
accuracy

 **50+**
entity types

 **42**
languages
(and growing!)

 **1,500**
requests/sec

 **45ms**
latency
