

# Securing Identities Workshop

Identity is today's control plane for digital transformation. Organizational barriers are blurring between who is in and out of your network. Cloud apps and the increasing use of personal devices and remote work mean that data is no longer centralized behind traditional network security.

With identity attacks on the rise, this workshop will show you how to stop tomorrow's data breaches by securing identities today.

We will help you find identity risks happening now in your environment, gain insights on your application landscape, and improve your identity security posture.

Get a rating of your identity security posture and see how it compares to your peers

Gain insights into apps used in your environment – even ones unsanctioned by IT

Understand how to prevent identities from being compromised

Learn how to reduce costs and improve business agility and security with simplified app access

## Ensure the right people are accessing the right information, securely.

In this workshop, we'll show you how identity is the fundamental pillars of an integrated security philosophy and end-to-end security strategy.

### Optimize identity

Identify potential risks related to identity and see opportunities for improvement.

### Assess security posture

Receive a numerical rating of your identity security posture and see how it compares to similar organizations.

### Reduce costs

Minimize expenses associated with password reset and helpdesk resources.

### Increase visibility

Get a sample survey of apps your employees are using and if IT supports them or not.

**We'll customize the workshop based on your organization's needs.**

## What to expect

The foundation of cybersecurity is to quickly and accurately identify authorized users and give them proper access to the information and tools they need to do their job. Our goal is to provide you with tools to protect your authorized users' identities so you can authenticate credentials and manage file access while still giving users the freedom to collaborate with others.

### We'll work with you to:

- Understand your identity goals and objectives
- Define your existing and desired identity security posture
- Provide insights into applications used within your environment (sanctioned and unsanctioned by IT)
- Showcase core IT and user security scenarios through demos
- Develop a joint action plan based key results, recommendations and next steps

ProArch was founded on the belief that a future where change is 'business as usual' is fundamentally more exciting than one where it is not.

We accelerate value and increase resilience for our clients with consulting and technology- enabled by cloud, guided by data, fueled by apps, and secured by design.
