

# MITIGATE DATA SHIELD

## AI-Ready Starts with Data Security.

**Mitigate DataShield** is a strategic **AI-readiness program built on M365 security**, designed to help organizations gain visibility, enforce protection, and reduce data risk before deploying Copilot and AI solutions.

Rather than a one-time assessment, DataShield is a guided transformation journey that activates Microsoft's built-in security and compliance capabilities in a practical, business-aligned way.

## The DataShield Transformation Roadmap

### Establish the Baseline

We validate tenant access and assess your security posture to define a clear starting point for AI readiness.

### Identify Exposure and Data Risk

We create deep visibility of how information flows across the organization and how governance can be strengthened.

### Activate Governance and Protection Controls

We translate insight into enforceable security control.

### Enable Continuous Monitoring and Oversight

We ensure long-term operational clarity and accountability.

### Prepare for Responsible Copilot and AI Adoption

With governance in place, we enable structured AI deployment.

# What Makes DataShield Strategic?

**Mitigate DataShield is designed to:**

- Align data protection with AI deployment
- Reduce exposure before intelligence amplifies it
- Embed control into daily collaboration
- Deliver measurable oversight and accountability

**It is practical, outcome-focused, and built for long-term impact.**

## Modern digital workplaces require more than tools, they require structure!

**Mitigate DataShield** provides a balanced approach that strengthens governance while enabling innovation. It ensures your Microsoft 365 environment is not only secure and organized, but also ready to support intelligent collaboration at scale.

### What to expect?

- ✓ Full visibility into your Microsoft 365 data estate
- ✓ Stronger compliance posture across collaboration platforms
- ✓ Reduce risk of Data leakage and oversharing
- ✓ Controlled access aligned with Zero Trust Principles
- ✓ Continuous monitoring of sensitive data exposure
- ✓ Clear Copilot governance framework
- ✓ Executive-level assurance for AI adoption

**Elevate Governance. Enhance  
Collaboration. Enable Intelligent Work.**
