

ProcureSQL

ProcureSQL

Your strategic data partner

John Sterrett
CEO

ProcureSQL

**Founded in 2014 with a
singular vision:**

**Empower businesses
to harness the full
potential of their data**

More than “just” databases

Yes, we do **database administration and optimization**

But also: **data architecture and strategy**

security and compliance

data engineering

analytics

cloud cost and/or licensing optimization

ProcureSQL

Problems we solve

Fulfilling part-time data architecture expertise needs

Making data processes run faster to scale to customer needs

Reducing cloud and database licensing costs

Reducing risk of data breaches

Creating analytics solutions that you up for success for maintenance and future enhancements

Development and quality control code reviews

Solutions we build

Migrated large, busy applications to Azure

Tuned and stress tested databases to prepare for heavy usage

Provided real-time data loads to support game-time decisions

Onboarded organizations to Power BI/Fabric

Built a Databricks POC to replace ADF and improve data load speed by 2x

Results we get

\$100,000 saved in SQL Server license costs

SQL Hyperscale footprint reduced by more than 50% by optimizing SQL code

Reduced nightly load times by hours by optimizing code and data storage strategy

Clean, organized data ready for AI

Secure and highly available data services

How we are different

ProcureSQL

Strategic partners, not just cheap staff augmentation or break-fix help desk support

Long-term relationships instead of short-term engagements

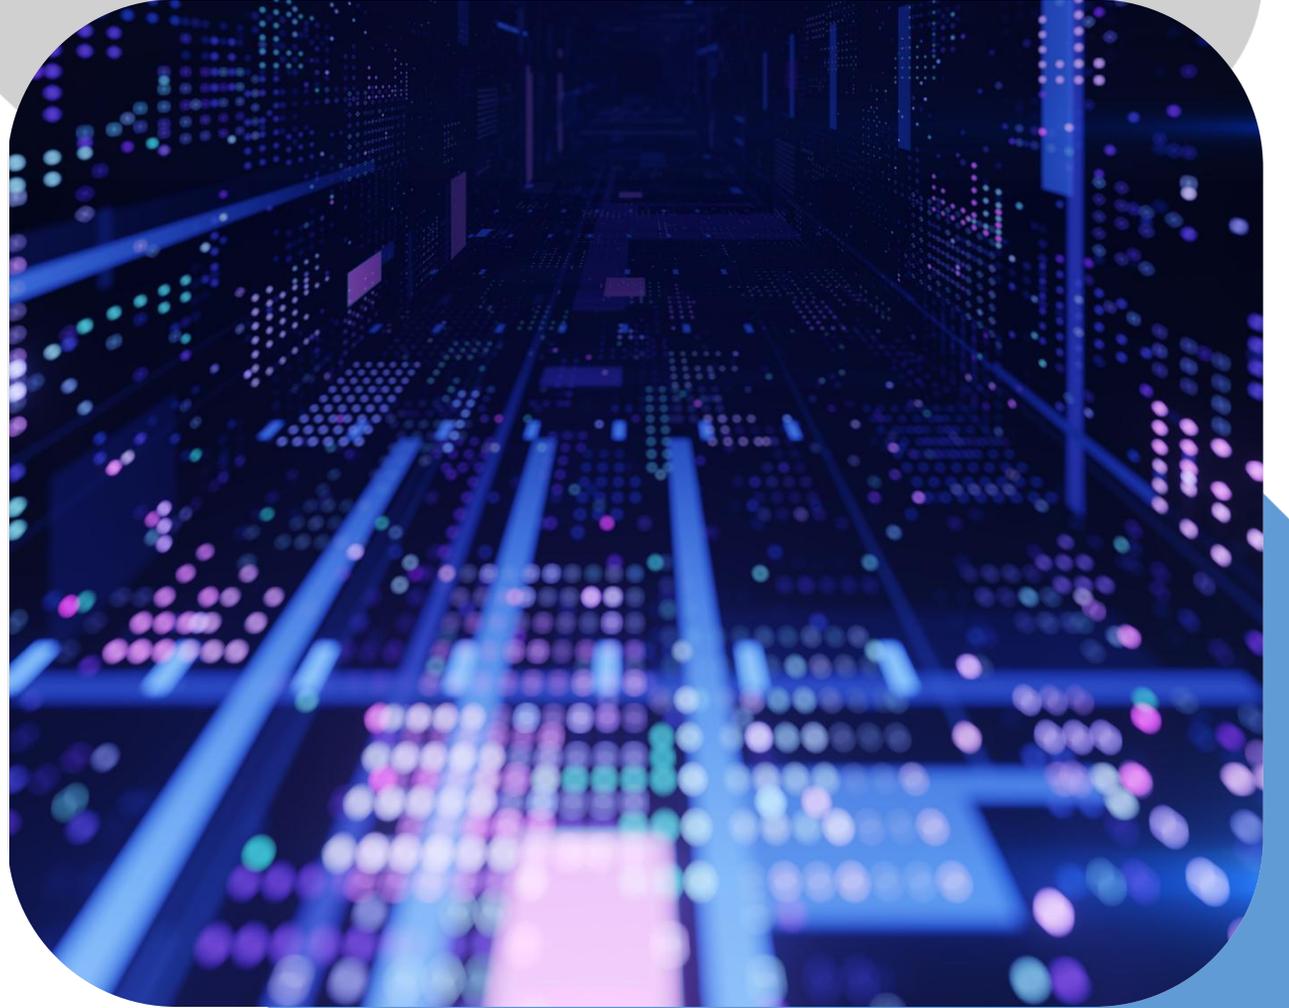

Multi-disciplinary data expertise

Access to multiple experienced professionals

ProcureSQL

Services

Database services

Database performance tuning

Data migration and upgrades

High availability solutions

Security and compliance audits

Database monitoring

Solution/code reviews

Analytics services

Data warehouses and lakehouses

Data integration

Real-time data processing

Semantic models

Reports and data visualization

Data catalogs

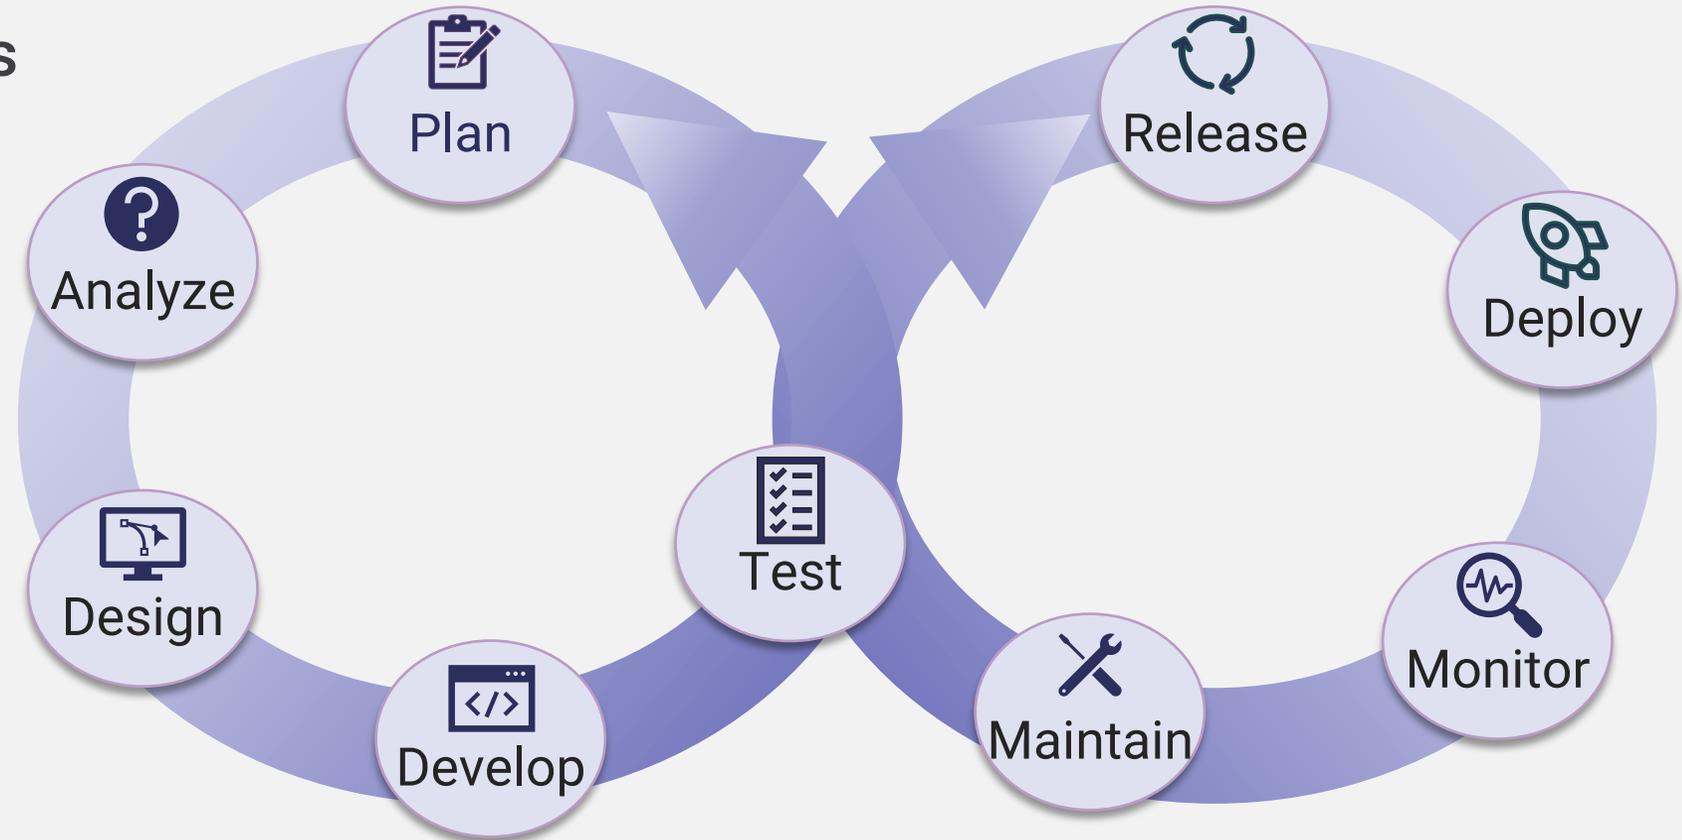

Solution/code reviews

We'll support you through the entire development and ops lifecycles

Application databases

Data pipelines

Reports and models

Technologies we work with

Azure

- SQL Database
- Databricks
- Data Factory
- SQL Virtual Machines
- Backup Vault
- VNets
- And more!

Fabric

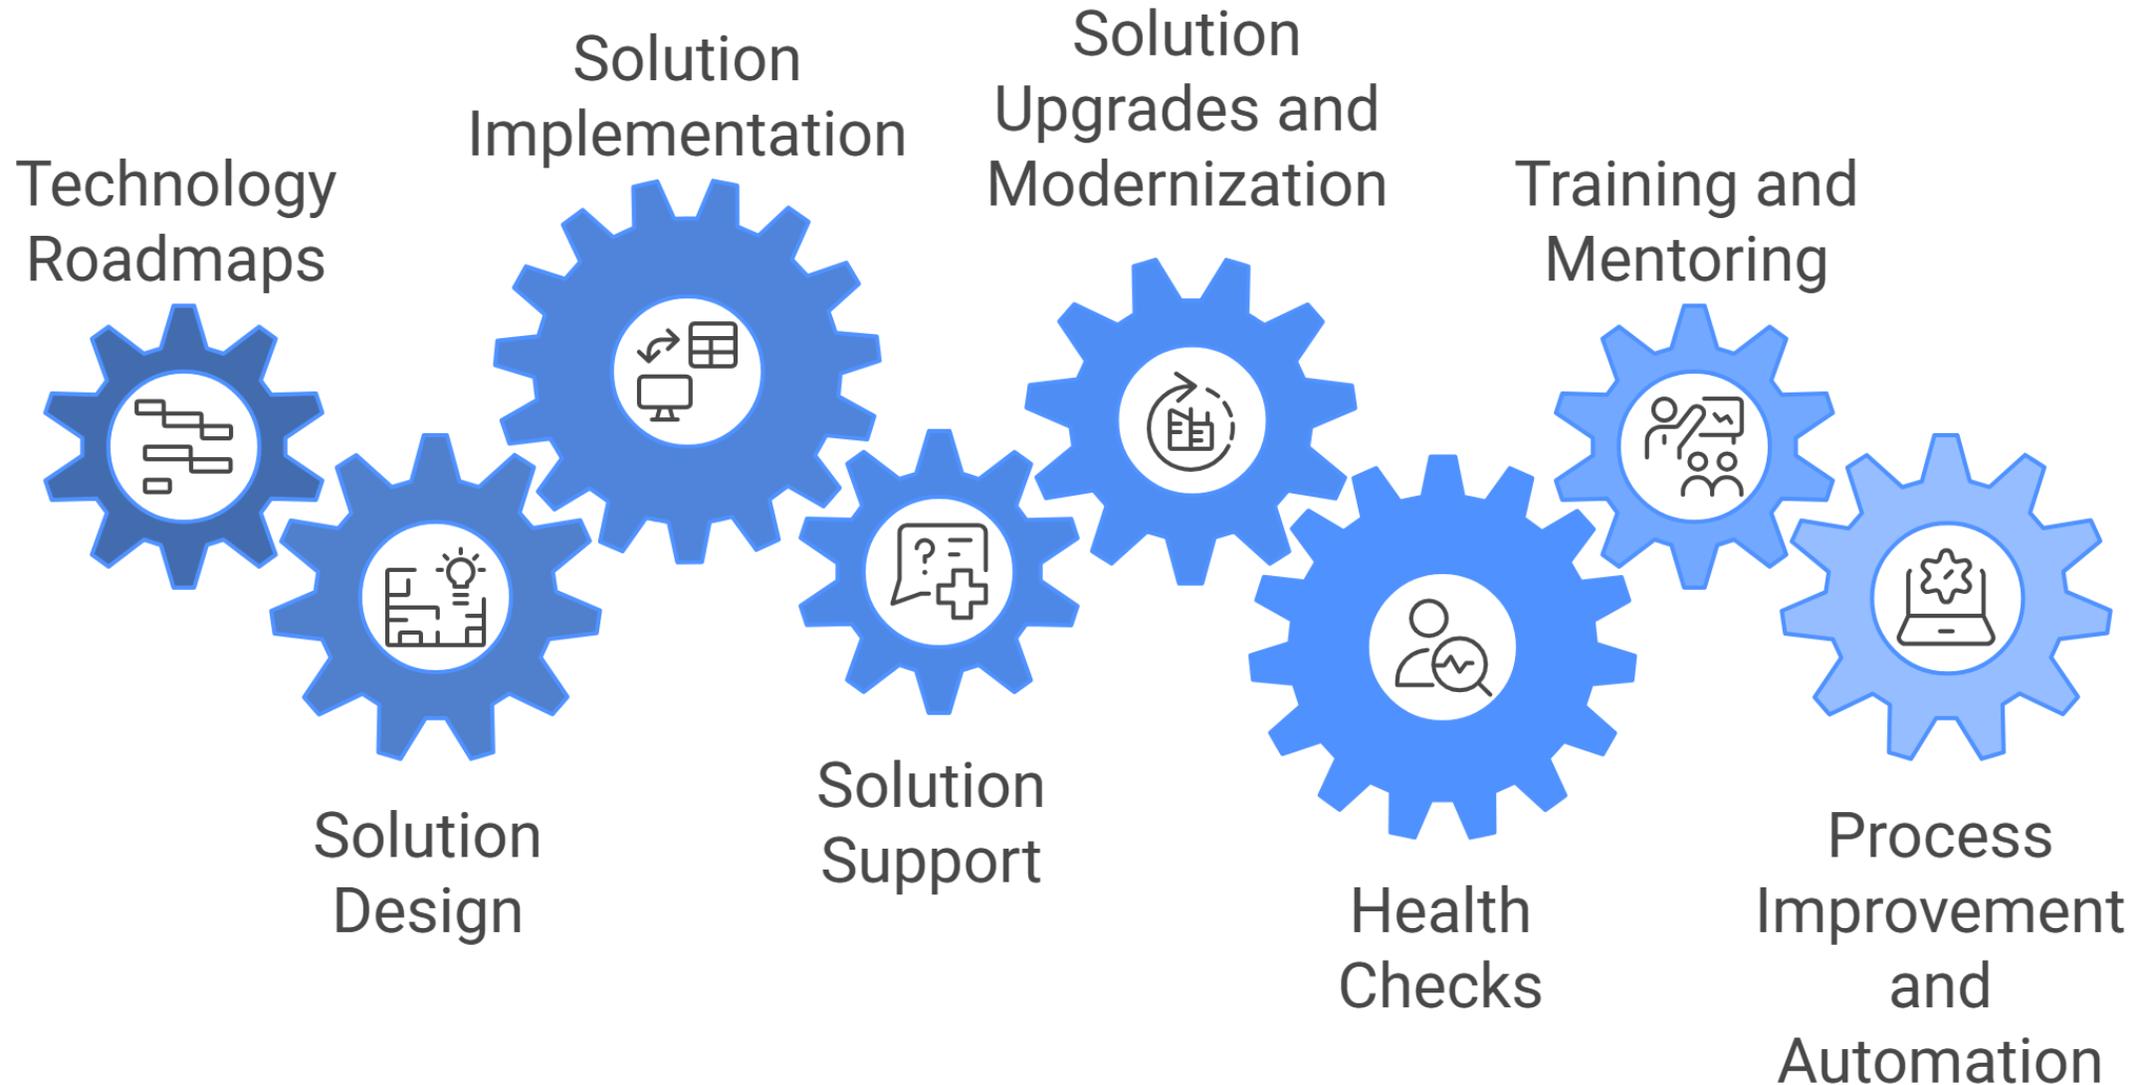

- Warehouse
- Lakehouse
- Notebooks
- Pipelines
- Reports
- Semantic models
- And more!

On Premises

- SQL Server
- SSIS/SSAS/SSRS
- Virtual machines
- SAN storage
- And more!

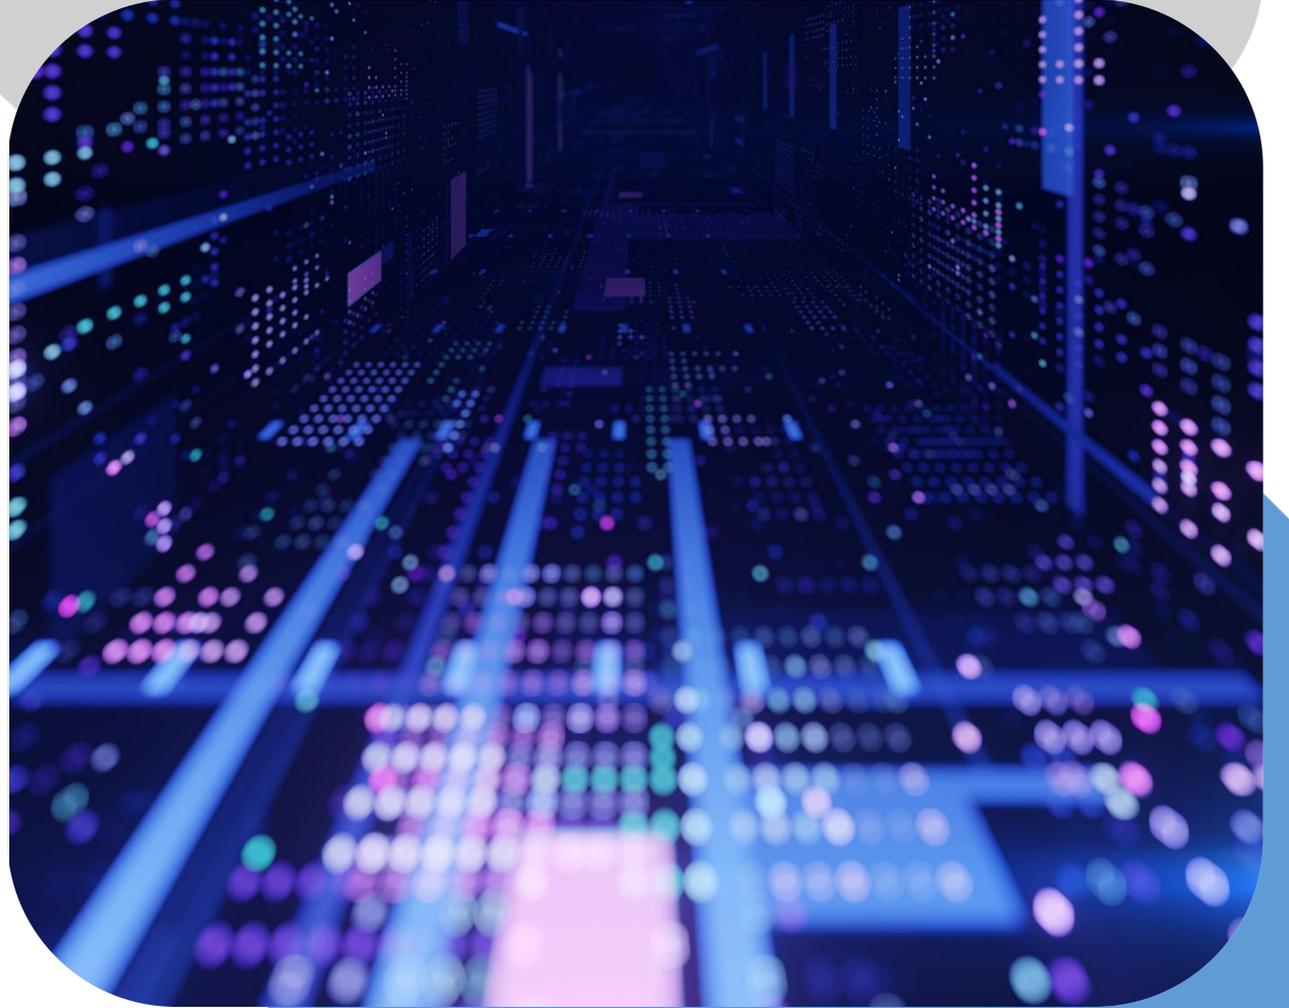

What we offer

ProcureSQL

What our clients say

Launching a business critical system

I could not be happier that we found you guys and have you on the team with us. Bringing you on has been such a positive for everyone here and this launch. Can't thank you enough for helping us get this critical new system off the ground! Data performance has been performing beautifully.

Sean McRae

CEO of Reliance Network

SQL Database Expertise

John's team has been able to help with projects, reviewing code before it goes to production, and providing expert support for our data analysts and technology partners. Now I recommend Procure SQL to anyone looking for SQL database services.

Michelle Miller

**American Board of
Emergency Medicine**

An Essential Part of the Team

We now consider John and the Procure SQL group part of our development team. They're not a one-and-done consulting firm. The mentoring they've provided to our team has been really valuable, and the response time when we call them for help has been phenomenal.

Jeremy Scheiderer

**Director of Development,
Tour de Force, Inc.**

Diagnose and Implement Solutions to Complex Situations

Without question, Procure SQL is the company I'd hire again. I had the pleasure of bringing them in to do just that for some remote SQL administration. Their expertise and experience proved to be a tremendous benefit to me and our company. I cannot recommend him enthusiastically enough. In addition to his expertise, his professionalism and ability to diagnose and implement effective solutions to complex situations while being willing to teach others during the process never went unnoticed.

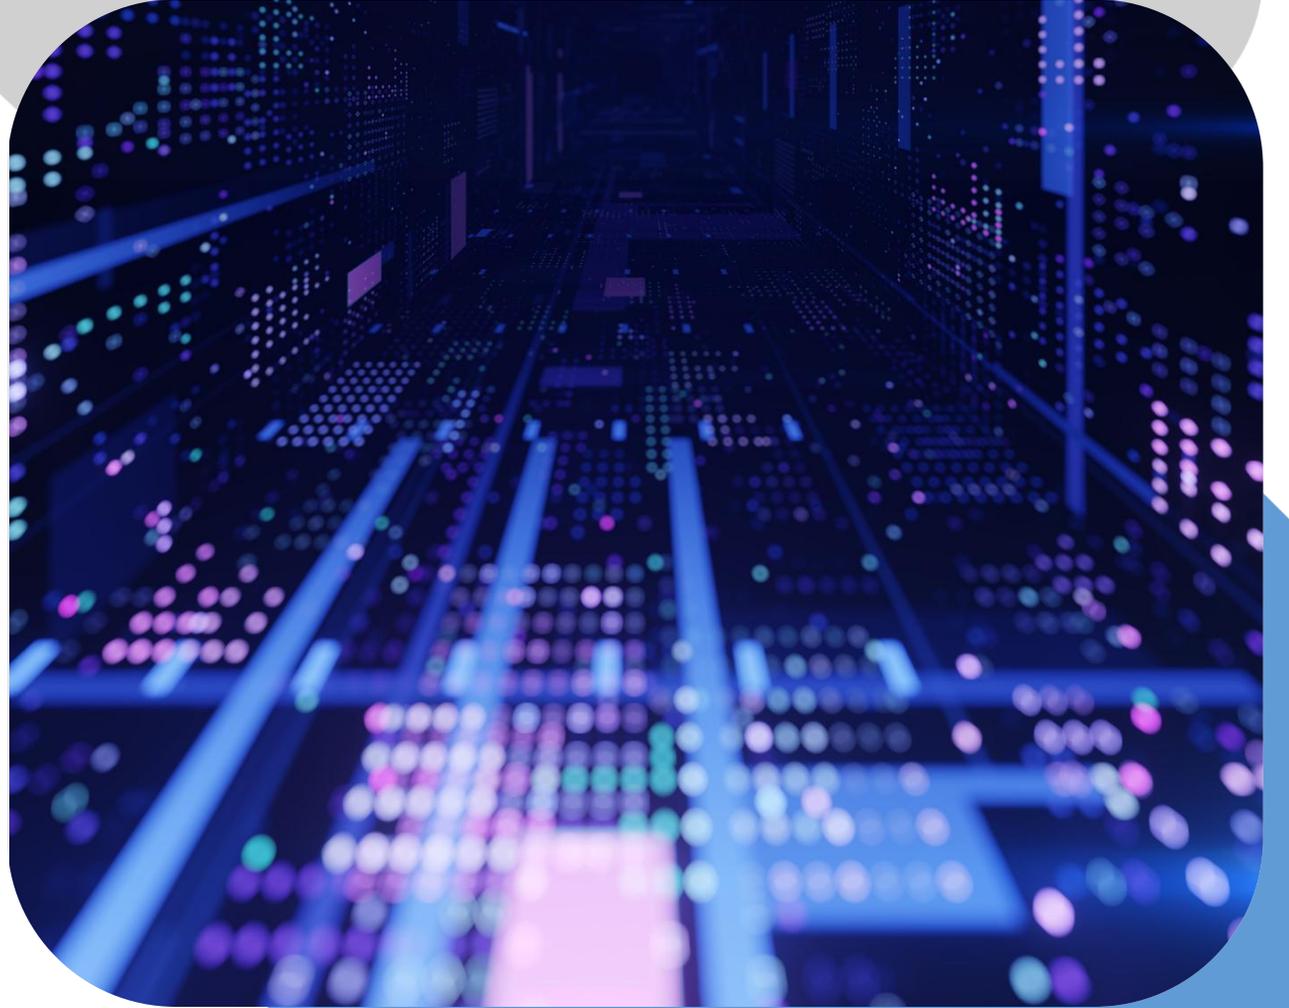

Kent Elmer

**Associate Vice President of
Software Development,
Xtend Healthcare**
