Objective-Driven
Decision Intelligence Platform

ProfitOps.AI™

Align Decisions to Objectives

Make smart decisions toward shared objectives, from supply chain teams to humanoids

The World's First Decision Intelligence Platform Powered by Objective-Driven AI

ProfitOps transforms enterprise decision-making by aligning shared objectives across teams and uncovering hidden opportunities for impact. Unlike traditional analytics tools that optimize isolated metrics, ProfitOps considers for upstream and downstream effects to optimize outcomes at the organizational level.

For example, faster delivery might benefit logistics, but it could inflate costs, hurt margins, or create inventory issues that affect other teams. ProfitOps balances such trade-offs to align every decision with enterprise-wide objectives.

It delivers opportunities directly at the point of execution: via chat for humans, embedded UIs for business apps, and real-time operational commands for AI and humanoids.
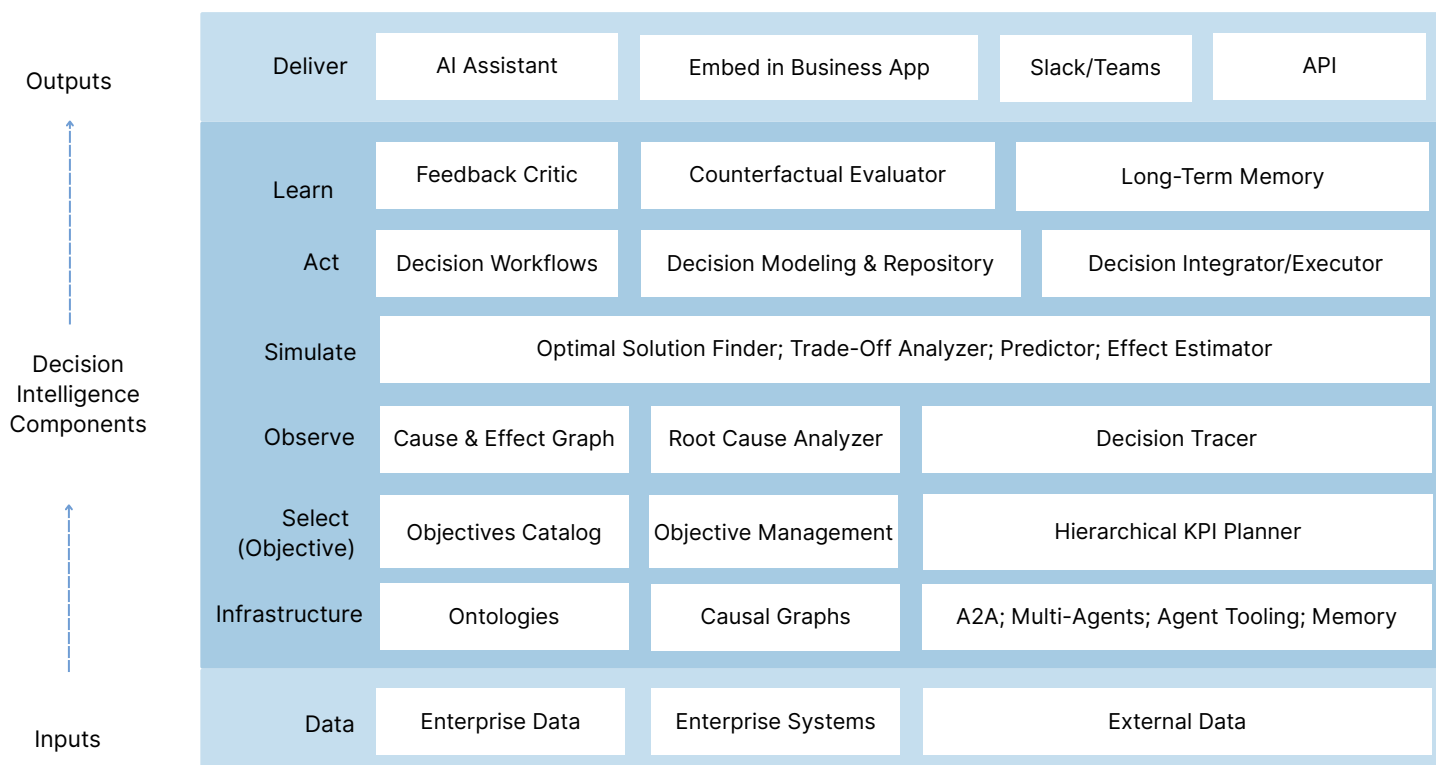

Operational Costs Reduce by 28.32% - 56.8%	**Predictive Accuracy** Up to 71.4%	**Decision-Making Speed** Cut from 24 hours to 18 minutes

Outputs

Deliver	AI Assistant	Embed in Business App	Slack/Teams	API

Decision Intelligence Components

Learn	Feedback Critic	Counterfactual Evaluator	Long-Term Memory	
Act	Decision Workflows	Decision Modeling & Repository	Decision Integrator/Executor	
Simulate	Optimal Solution Finder; Trade-Off Analyzer; Predictor; Effect Estimator			
Observe	Cause & Effect Graph	Root Cause Analyzer	Decision Tracer	
Select (Objective)	Objectives Catalog	Objective Management	Hierarchical KPI Planner	
Infrastructure	Ontologies	Causal Graphs	A2A; Multi-Agents; Agent Tooling; Memory	

Inputs

Data	Enterprise Data	Enterprise Systems	External Data
