

DMA: DATACENTER MIGRATION TO AZURE

 progesoftware

DMA: The solution for cross-markets customers who wants to migrate their existing workloads quickly and efficiently.

Challenges

Many customers are often reluctant from transitioning their workloads to the cloud because of many blocking factors.

- Infrastructure and code obsolescence.
- Lack of support from vendors.
- Expected downtimes during migration.

Ideal Solution

An integrated, automated and agile solution, able to integrate in any scenario and any cloud delivery model.

- Guides migration for any workload.
- Reduces migration times and costs.
- Enable new support levels.

Desired Outcomes

- Ensure all migrated workloads are consistent
- Revive and update obsolete workloads
- Start benefits from the cloud values since the beginning
- Enhanced workloads resiliency.
- Reduced migration downtime and rollbacks.
- Efficiently migrate workloads to the cloud.

Progesoftware DMA : Datacenter Migration to Microsoft Azure

DMA provides a set of processes, procedures and tools to assist the customers to assess, organize, prioritize and migrate their existing workloads to Azure.

Efficient

DMA guarantee the best migration results.

- Efficient Processes.
- Clear Procedures.
- Customized tools.

Robust

No matter what the scenario is, DMA can be adapted to it.

- Drive each workload to the right delivery model.
- Proven test set to reduce downtimes and rollbacks.

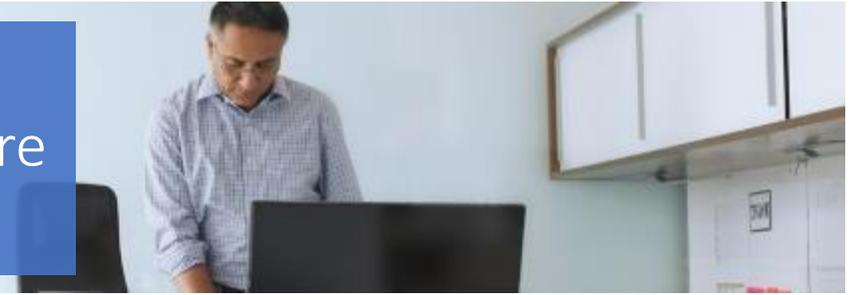

Faster

Dramatically improves workloads migration speed.

- Guided adoption and transition paths to the desired model.
- Migration automation and orchestration.

Proge-Software: Build the Future Today...

Progesoftware DMA : Datacenter Migration to Microsoft Azure

DMA is based on Azure Services, such as Operations Management Suite, Azure File Sync, SQL on Azure and others, both in IaaS and PaaS delivery models.

Solution Alignment

Integrated

DMA integrates with Azure Services and gets the most out of them.

Best Practice Based

DMA relies on the most actual Best Practices and cloud adoption guidelines.

Scalable

Migrating any kind of workloads of any size.

Customer Success Story

ENASARCO has started its cloud adoption path to Azure with the support of DMA solution to produce the best advantages from the new services, speeding up its transition from 2 to 1 year.

Deal Size:

50K Azure

55K Professional Services

Win Results

DMA leverages Microsoft Azure services and Best Practices, inteDMA relies on the most actual Best Practices and cloud adoption guidelines.

Using DMA, customers would benefit from smoother and faster migration, maximizing transition efficiency with a higher success levels, therefore reducing downtimes and rollbacks.

Whether the migration will require to Rehost, Refactor, Replatform or Replace the existing workloads, DMA will provide a complete end-to-end adoption path to satisfy the most complex scenarios.
