

Microsoft365 Copilot Readiness Journey: Workshop

We guide companies in the digital transformation. We have always been committed to delivering results that exceed our customers' expectations, creating value and competitive advantage through innovative projects. Our job is not only to design tailor-made solutions to guide our customers in the Digital Transformation, but also to accompany them in their growth.

A unique contact that can support you in every single Copilot declination able to understand customer needs for a personalized AI-powered solution and relevant adoption.

We have developed “Microsoft 365 Copilot Readiness Journey Workshop” proposal to assure you that your environment respects all the fundamental principles of **fairness, reliability, prevention from risks of involuntary origin, privacy, protection from threats, inclusiveness, transparency and accountability** which are the foundations for using Copilot safely and effectively.

Every element that contributes to your Security and Compliance Posture will be addressed to ensure that Copilot Generative Artificial Intelligence boost your productivity in a secure, privacy - and regulatory - compliant way, respecting policies and local regulations.
