

# PROGE LEARNING INSIGHTS

AZURE AND TEAMS TO MONITOR DISTANCE LEARNING

Proge Learning Insights: a solution that helps learning institutes to analyze important KPI in a simple and automated way.

## Challenges

With the problems related to the Covid-19 pandemic, the Universities had to face many organizational pitfalls related to distance learning, but thanks to the use of Microsoft Teams it was possible to better organize the university meetings and courses held by the teachers. The Teams platform, however, does not allow reporting of data relating to calls made after more than 30 days or the ability to analyze teaching activities to evaluate the efficiency of the lessons held.

## Ideal Solution

Proge-Software, thanks to the technologies made available by Microsoft Cloud, has created an architecture capable of storing such data and saving them within an Azure SQL Database. In this way, through direct integration with the Power BI Pro product, it was possible to create advanced reports that are easy to consult.

## Desired Outcomes

Proge Learning Insights allows the Universities to historicize and monitor the progress of remote lessons on a daily basis. Through the advanced analytics Power BI dashboard it is possible to analyze information from Teams meetings integrated with those relating to study paths (teachers, lectures, academic year, etc.).

Proge Learning Insights: a solution that helps learning institutes to analyze important KPI in a simple and automated way.

Proge Learning Insights is a solution that automates the management and the monitoring of the entire distance learning offer in learning institutes.

## Efficient

Guarantees the best results with minimal effort.

- Zero on-prem footprint
- High performance, no downtime
- Completely automated

## Easy

Easy integration with University services

- No manual updates, no errors
- Technology is containerized

## Fast

Dramatically reduces teams management overhead.

- Faster reporting
- High quality level

# Customer Success Story

Uni Bologna was a pioneer in the adoption of Proge Learning Insights and believed from the beginning in the potential of our solution. They've been payed off by being ready to provide their students with distance learning since day 1.

*Deal Size:*

*10K Azure*

*25K Professional Services*

*\*Confidential & Internal Only*

## Win Results

Proge Learning Insights: a solution that helps learning institutes to analyze important KPI in a simple and automated way.

Through the integration of Azure, Microsoft Graph API and Teams with all the information systems of universities and educational institutions, Proge Learning Insights responds in a timely, rapid and efficient way to the growing need to remotely manage lessons, laboratories and exams.

Proge Learning Insights is a solution that automates the management and the monitoring of the entire distance learning offer in learning institutes.
