# PROJECT
## WeAreProject

# Azure Active Directory Premium

Identity is today's control plane for digital transformation. Organizational barriers are blurring between who is in and out of your network. Cloud apps and the increasing use of personal devices and remote work mean that data is no longer centralized behind traditional network security.

With identity attacks on the rise, this workshop will show you how to stop tomorrow's data breaches by securing identities today.

We will help you find identity risks happening now in your environment, gain insights on your application landscape, and improve your identity security posture.

## OUTCOMES

The foundation of cybersecurity is to quickly and accurately identify authorized users and give them proper access to the information and tools they need to do their job. Our goal is to provide you with tools to protect your authorized users' identities so you can authenticate credentials and manage file access while still giving users the freedom to collaborate with others.

### Optimize identity
Identify potential risks related to identity and see opportunities for improvement.

### Assess security posture
Receive a numerical rating of your identity security posture and see how it compares to similar organizations.

### Reduce costs
Minimize expenses associated with password reset and helpdesk resources.

### Increase visibility
Get a sample survey of apps your employees are using and if IT supports them or not.

## CAPABILITIES

Get a rating of your identity security posture and see how it compares to your peers

Gain insights into apps used in your environment – even ones unsanctioned by IT

Understand how to prevent identities from being compromised

Learn how to reduce costs and improve business agility and security

# Duration: 8 Days

## Azure Active Directory

Protect your users, apps, workloads, and devices.

### Secure adaptive access
Protect access to resources and data using strong authentication and risk-based adaptive access policies without compromising user experience.

### Seamless user experiences
Provide an easy, fast sign-in experience across your multicloud environment to keep your users productive, reduce time managing passwords, and increase productivity.

### Unified identity management
Manage all your identities and access to all your applications in a central location, whether they're in the cloud or on-premises, to improve visibility and control.

### Simplified identity governance
Control access to apps and data for all users and admins efficiently with automated identity governance to ensure only authorized users have access.
