Defender for Office 365

Defend Against Threats

Do you know how many phishing attacks your organization has received? If employees are using the right password protocol? Whether personal data is being exposed? In short, is your organization's cloud environment as secure as you think it is?

Organizations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives—and identify current and real threats—by scheduling a Defend Against Threats

◆ OUTCOMES ◆

We can help you develop a strategic plan customized for your organization based on the recommendations of Microsoft experts in security. You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to upgrade your security posture for the long term.

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it's essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward

Identify current, ongoing security threats in your cloud environment	Walk away with actionable next steps based on your specific needs and objectives	Document your security strategy for the benefit of key stakeholders	Better understand how to accelerate your security journey using the latest tools

◆ CAPABILITIES ◆

Review your security goals and objectives

Identify real threats in your cloud environment with Threat Check

Map identified threats to specific solution recommendations

Showcase security scenarios with product demos

Develop joint plans and next steps

Duration: 5 Days

Protecting Office 365

Protect | Detect | Investigate | Remediate with Microsoft Defender for Office 365
