

# Windows 365 Cloud PC

Shifting workforce and organizational needs

Modern endpoint management protects the organization while enabling employees to work on their own terms. They can work anywhere and at any time, and do so as well as they would in the office, thus improving both satisfaction and productivity.

In our new world of work the endpoint is the new workplace, and hybrid work is driving the endpoint strategy. The shift to remote and hybrid work represents a shift in how we think about providing people with the tools they need.

Most organizations, 90 percent, anticipate seeing more usage on cloud platforms than ever before. As a result,

optimizing existing investments in cloud solutions remains a top priority.

Many organizations, 77 percent of those surveyed, agree on the importance of providing the latest technology to their employees, giving users the devices that they want while giving IT the capability to keep them secure.

Lastly, 80 percent of companies plan to invest in new and emerging technologies, opening the conversation on the most efficient way to deploy, manage, and secure these new endpoints.

## OUTCOMES

**Windows 365** provides the classic PC experience, in the cloud. With the instant launch of your personal Cloud PC, the user can **transfer applications, data and settings** from the cloud to **any device**. In addition,

the cloud provides greater versatility in processing power and storage, offering scalability to organizations.

### 01 Onboarding and provisioning

Zero-touch approach to getting employees, vendors, and contractors up and running across a variety of devices and locations.

### 02 Business continuity

Responding quickly to changing workplace situations to mitigate negative impact and seize opportunities.

### 03 Security and regulation

Securing organizational and customer data while addressing growing complexity in compliance, without sacrificing productivity.

## CAPABILITIES

**Data security**  
Improve regulatory compliance and IP protection via data centralization and a reduced threat surface.

**High-capacity computing**  
Cloud-scale compute and storage to support specialized workloads like design and development.

**BYOPC programs**  
Enable secure Cloud PCs, even on personal devices.

# Duration: 4 Days

## Windows 365

A new solution for today's hybrid workforce
