

M365 cybersecurity assessment

Secure Identities and Access

Are you aware of suspicious user and sign-in behavior in your environment? Are you threatened by ongoing suspicious requests?

Identity is today's control plane for digital transformation. Organizational barriers are blurring between who is in and out of your network. Cloud apps and the increasing use of personal devices and remote work mean that data is no longer centralized behind traditional network security.

With identity attacks on the rise, this workshop will show you how to stop tomorrow's data breaches by securing identities today.

We will help you find identity risks happening now in your environment, gain insights on your application landscape, and improve your identity security posture.

◆ OUTCOMES ◆

The foundation of cybersecurity is to quickly and accurately identify authorized users and give them proper access to the information and tools they need to do their job. Our goal is to provide you with tools to protect your authorized users' identities so you can authenticate credentials and

manage file access while still giving users the freedom to collaborate with others.

Optimize identity

Identify potential risks related to identity and see opportunities for improvement.

Assess security posture

Receive a numerical rating of your identity security posture and see how it compares to similar organizations.

Reduce costs

Minimize expenses associated with password reset and helpdesk resources.

Increase visibility

Get a sample survey of apps your employees are using and if IT supports them or not.

◆ CAPABILITIES ◆

Get a rating of your identity security posture and see how it compares to your peers

Gain insights into apps used in your environment – even ones unsanctioned by IT

Understand how to prevent identities from being compromised

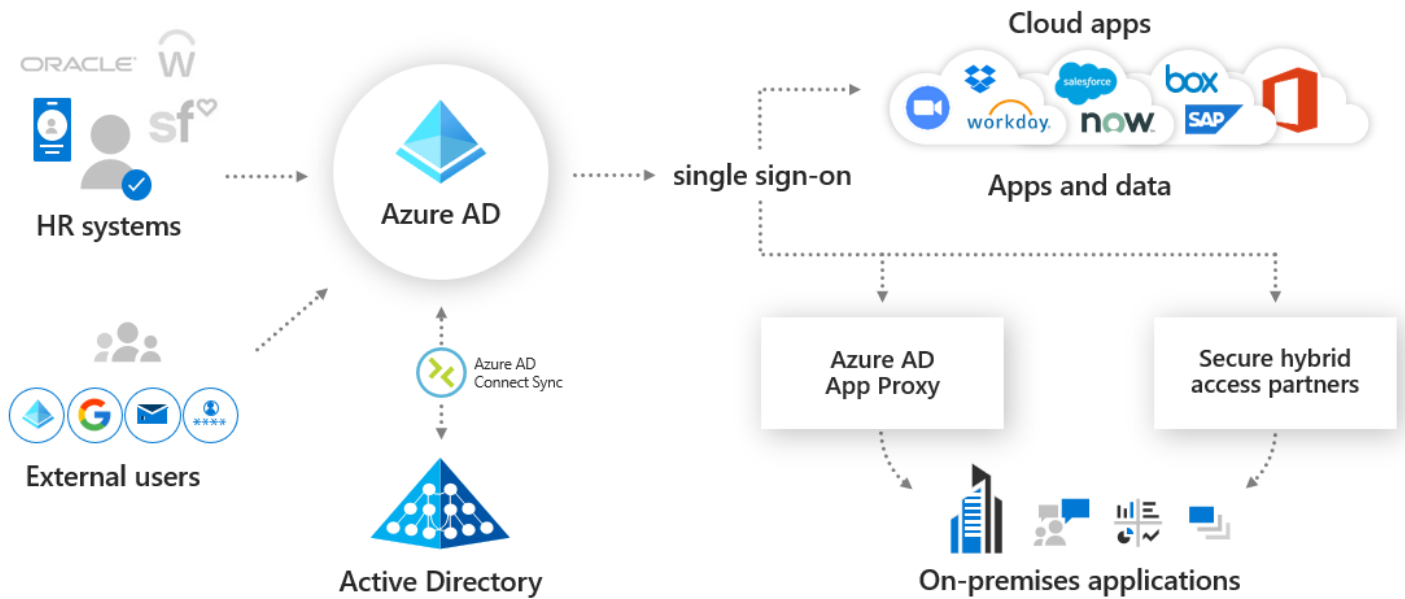

Learn how to reduce costs and improve business agility and security with simplified app access

Duration: 4 Days

Connect all your users and apps

Enable access to resources securely with a single identity to improve control and visibility
