Microsoft Teams Live Events

Extreme flexibility and hybrid work define the post-pandemic workplace.

This new era of hybrid work isn't as simple as combining the old reality of the workplace with the new reality of remote work. Hybrid Meetings builds on the new wave of digital transformation and cloud power, and drives new ways to work and be together, to coordinate and collaborate, and to build a modern workplace that is as flexible and adaptive as possible - one that produces both happier people and better projects.

Work continues to evolve, and business leaders are looking for a new operating model, defined by flexibility. To succeed, organizations need to focus on three things: putting the right policies in place, reconfiguring physical spaces, and using technology to put it all together.

Technology is the binding factor to create inclusive meeting and collaboration experiences using Teams meetings, Microsoft Teams Rooms, and devices.

The Teams Live Events Workshop is a modular engagement to help define your business priorities and scenarios that drive your Live Events. This workshop is designed to showcase hybrid meetings through 'art of the possible' immersive experiences, use case design, and deep dive planning.

Assess
Gather information on current environment, spaces, and meeting practices

Art of the Possible
Showcase Microsoft Teams Live Events and hybrid meeting experiences

Build the Plan
Build the strategy and roadmap for deployment of Microsoft Teams Live Events and hybrid meetings
