Passionate Consultants  
with real world experience

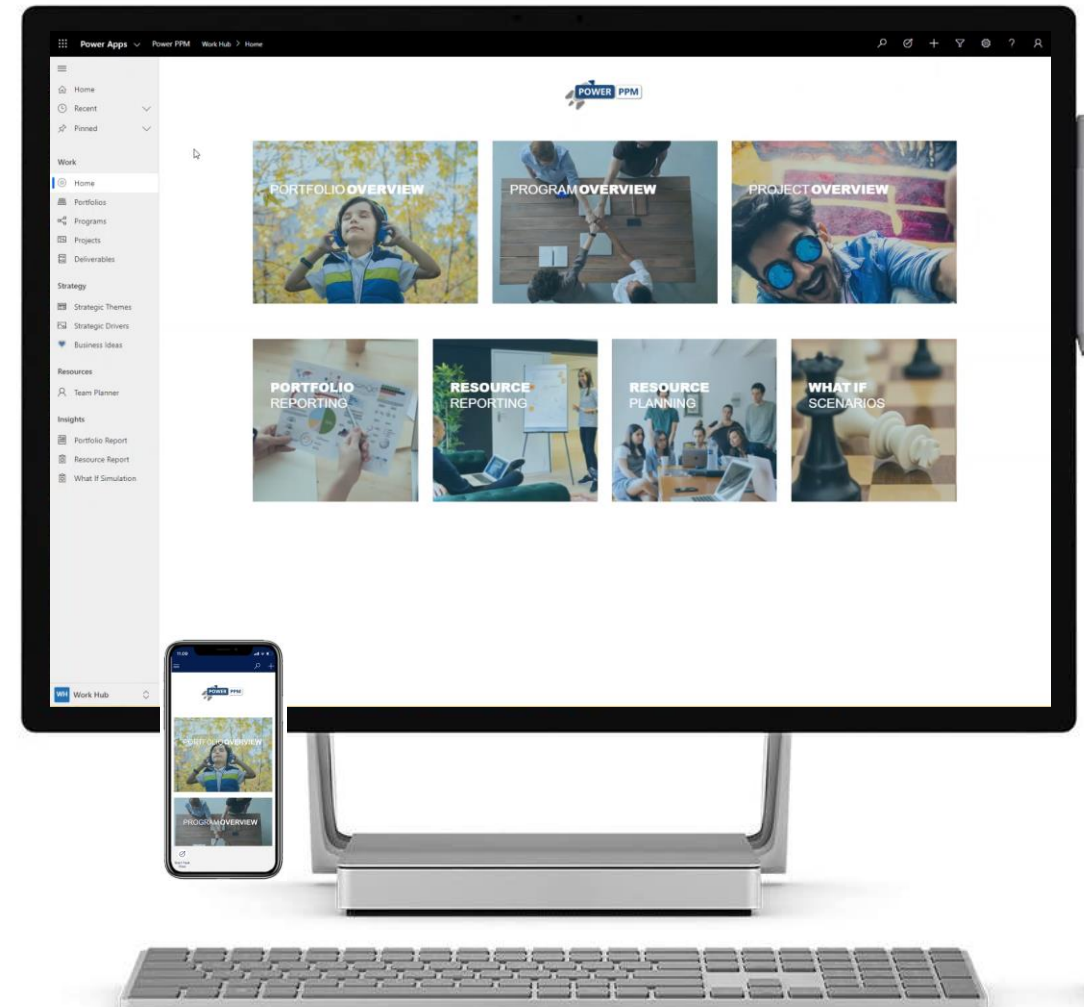

Member of the Microsoft Advisory Council  
and MVPs within Business Applications and Office apps & Services

# SUMMARY OF PROJECTUM CONSULTING SKILLS

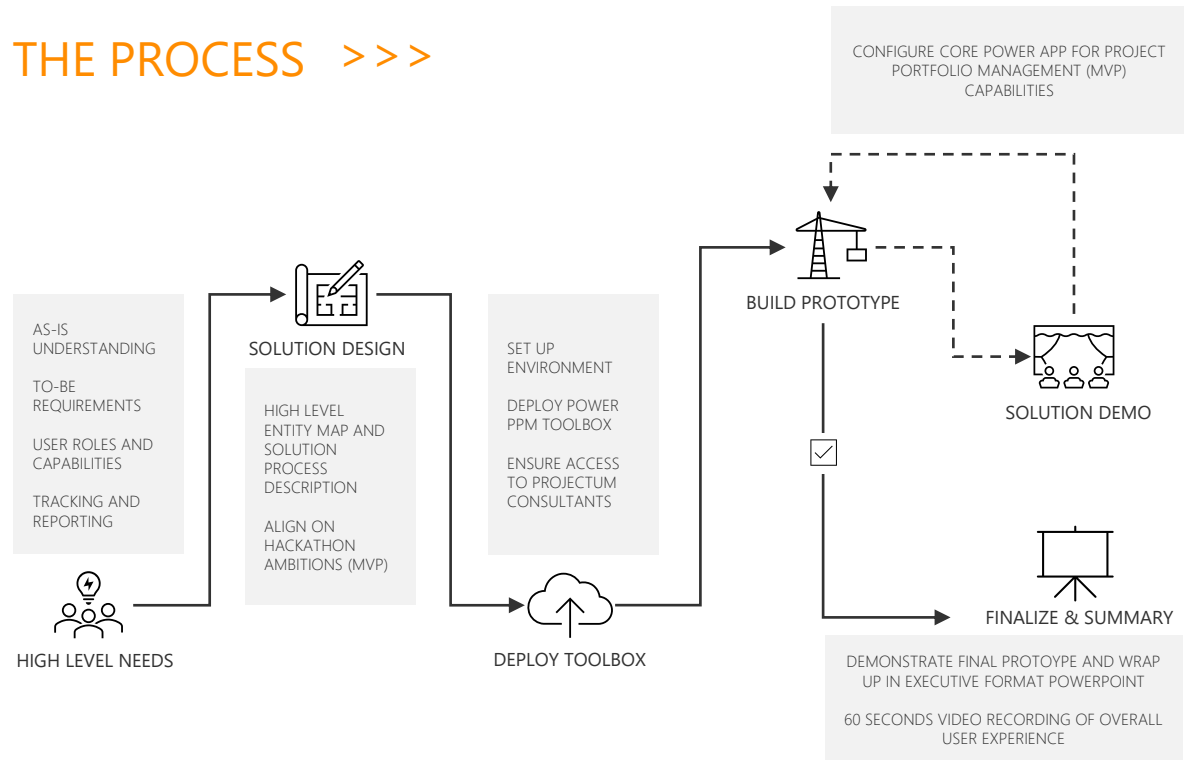

# WHAT IS A POWER PPM HACKATHON?

The Power PPM hackathon is a three-day event, where capable Projectum Consultants design a first-wave PPM solution together with you as a client. This consulting offer implies that we 'go right at it' – together with your PMO and selected stakeholders – and essentially design and configure a working pilot. After the hackathon, you can see the cornerstone of the PPM Solution you envisioned, but also have a working pilot which you can continue working in and expand after.

# POWER PPM HACKATHON- ACCELERATED PROTOTYPE DEVELOPMENT

## THE PROCESS >>>

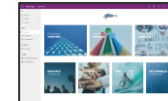

### DELIVERABLES

#### ENTITY MAP & SOLUTION DESIGN

#### WORKING PROTOTYPE

#### EXECUTIVE SUMMARY AND VIDEO

### DELIVERY TEAM

1 X EXECUTIVE CONSULTANT  
&  
1 X TECHNICAL CONSULTANT

### LOCATION

VIRTUAL OR  
ON SITE

### COST

1080 EUR

# The hackathon approach

## **Very short lead time**

Right to configurations excluding an extensive analysis phase

## **Build with client team**

A working pilot solution can be built with the client team

## **Crazy efficient**

War room/sprint style building is so much more efficient than the classic setup

## **Training included**

Since the client is part of the workshop an ownership from the beginning will be experienced

# OUR PROFILES

All our consultants working on projects in the power platform have the relevant MS certifications and have experience working with the tools within the power platform. Any project will be staffed with relevant profiles from the ones shown here.

To ensure the best advise throughout the process, the **SOLUTION LEAD** provided will be one of our Power Platform specialists.

They all have extensive experience defining and building solutions in the Power Platform and they work closely with the Microsoft product teams and are often used for internal and external events and training sessions like App in a Day.

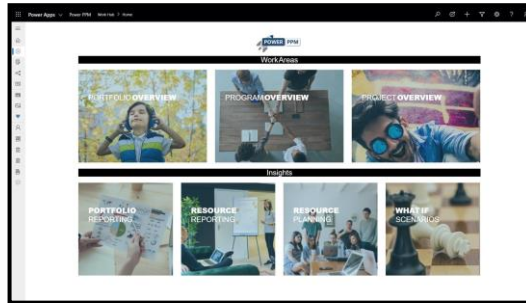

Our **CONSULTANTS** are all well versed in building solutions utilizing not only the tools in the power platform but also other tools such as teams

Our **BI CONSULTANTS** are experienced in the entire process from hosting exploratory workshops to building sound data models and reports

Our skilled **PROJECT MANAGERS** are always available to help ensure that the project stays on track

Even though the Power Platform is marketed as low code, there is still a need for good developers. **DEVELOPERS** are the backbone of any good solution; providing additional functionality and ensuring optimal performance

# PROJECTUM OFFERS

## SOLUTIONS

*Modern "Ready to Go" Solutions*

Our Power PPM solution provide a fully functional PPM model-driven app plus several PCF components that can be utilized in any solution built within the Microsoft Power Platform.

## CONSULTING

*Hackathons, Advisory & Implementations*

Our consultants can provide solid counseling from defining the process or scope needed and building the initial business case and pilot to building the full solution.

A screenshot of the Team Planner application. It shows a resource allocation grid with columns for months from April 2024 to May 2025. The grid lists resources like 'John Doe' and 'Jane Smith' and shows their availability and allocation over time. The Projectum logo is in the top right corner.

## PRODUCTS

*Proven Apps & Accelerators*

In addition to solutions built within the Microsoft Power Platform, we also have our own apps such as Team Planner. This tool acts as a standalone resource management tool but can be embedded in Microsoft Teams for a seamless user experience.

## SUPPORT

*Customer Care & Support*

We offer all our clients to sign service level agreements when a project has been delivered.
