

Boosting Regulatory Assessment with Generative AI

Prometeia leverages Generative AI to automate credit risk model validation, reducing manual workload and enhancing compliance accuracy.

Key Benefits

- **Time & Cost Efficiency:** AI reduces manual validation efforts, freeing up resources for high-value tasks.
- **Enhanced Accuracy:** AI ensures consistent regulatory compliance and minimizes human error.
- **Scalability:** Designed to expand to multiple risk areas (IFRS9, IRRBB, cyber, operational risks).

Technology Overview:

- **Advanced AI Processing:** Intelligent document ingestion and text segmentation.
- **Retrieval-Augmented Generation (RAG):** Focuses on relevant document sections to prevent errors.
- **Multi-Step Contextual Processing:** Ensures thorough and iterative assessment for compliance validation.

Future Roadmap

Expansion to IFRS9, IRRBB, and additional risk categories.

Scalability across multiple geographies and regulatory frameworks.

Integration of open-source AI models for improved customization.
