

**Category:** Technical

**Date:** Ongoing

Power Apps is a low or no-code application builder from Microsoft that gives you a way to deliver applications to your end-users at a rapid pace. When you build a Power App, it works cross-platform, from your phone, web and tablet devices with one click.

This one-day sessions covers key concepts and capabilities in PowerApps and Microsoft Flow. This daylong session includes instruction that will help attendees understand how to leverage this powerful toolset in their organisation.

Along with live demonstrations, walk throughs and instruction, you will spend your time during the session using these tools to completing labs. The labs focus on key feature areas within Power Apps, Power Automate & Dataverse.

**Technologies used:**

Power Apps, Power Automate & Dataverse

**Prior knowledge**

No prior knowledge or experience is required to take this course

**About the instructor**

Dhruvin Shah is a Microsoft MVP for Business Application and Microsoft Certified Trainer(MCT) with extensive experience. He has real life experience in delivering complex customer projects using Power Platform and he is Power Platform lead at Prometix (Microsoft Gold Partner). He is the Power Platform evangelist and spoken in numerous conferences worldwide. He is a passionate YouTuber having 700+ videos covering different Office 365 content, Power Platform Tips and Tricks, SharePoint informative videos and much more. He always believes in "Sharing is Caring" and whatever he learn during his professional career, he loves to share with the audience, so that they can learn the same thing easily.
